7

Special Programs: PATCH Program

“Patient Assistance Team at Children’s Hospital & Medical Center”

- Family-centered, team-based (Child Life)
- Develop individualized Adaptive Care Plans with parents/guardians
- Currently available to patients diagnosed with Autism Spectrum Disorder
- Future plans to expand scope
- Piloted in Outpatient Surgery, expanded this week hospital-wide

8

Special Programs: Project Austin

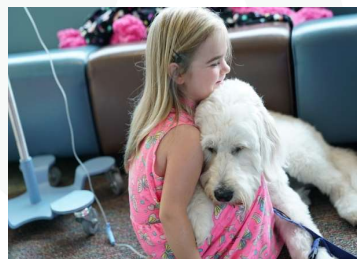

Children with complex, special health care needs

- Family-centered, team and community-based
- Program enrollment is optional
- Emergency Information Form (EIF) completed with family
- EIF sent to child's local EMS, community hospital, primary care provider, and caregivers
- Education provided to community contacts and responders, if requested
- If emergency happens, 911 dispatch and local medical professionals will know "Project Austin"

9

Special Programs: Facility Dogs

- Support during IV start, lab draws, and NG placements
- Ambulation support
- Coping with new diagnoses
- Medical Play
- Normalization
