HEALTH

**T**he Governance Institute provides trusted, independent information, resources, and solutions to board members, healthcare executives, and physician leaders in support of their efforts to lead and govern their organizations.

The Governance Institute is a membership organization serving not-for-profit hospital and health system boards of directors, executives, and physician leadership. Membership services are provided through research and publications, conferences, and advisory services. In addition to its membership services, The Governance Institute conducts research studies, tracks healthcare industry trends, and showcases governance practices of leading healthcare boards across the country.

**T**he Governance Institute is a service of NRC Health. Leading in the field of healthcare governance since 1986, The Governance Institute provides education and information services to hospital and health system boards of directors across the country. For more information about our services, please call toll free at (877) 712-8778, or visit our Web site at [GovernanceInstitute.com](http://GovernanceInstitute.com).

The Governance Institute endeavors to ensure the accuracy of the information it provides to its members. This publication contains data obtained from multiple sources, and The Governance Institute cannot guarantee the accuracy of the information or its analysis in all cases. The Governance Institute is not involved in representation of clinical, legal, accounting, or other professional services. Its publications should not be construed as professional advice based on any specific set of facts or circumstances. Ideas or opinions expressed remain the responsibility of the named author(s). In regards to matters that involve clinical practice and direct patient treatment, members are advised to consult with their medical staffs and senior management, or other appropriate professionals, prior to implementing any changes based on this publication. The Governance Institute is not responsible for any claims or losses that may arise from any errors or omissions in our publications whether caused by The Governance Institute or its sources.

# INTRODUCTION

**W**elcome to the world of healthcare. Successful navigation through this complex world requires a cache of tools, first and foremost of which is a guide to the language, terminology, and jargon.

The ninth edition of *Healthcare Acronyms & Terms* provides new terms that reflect the many forces currently transforming the healthcare industry. Hospitals and health systems are working to transition to value-based care models and payment arrangements, improve quality while lowering costs, and seamlessly coordinate care across the continuum—all which requires new mindsets and innovative approaches to providing customer-centric care. This edition reflects new terms that have emerged due to these changing priorities, as well as boardroom and industry trends.

This booklet both demystifies healthcare and updates the user's healthcare vocabulary. It actually serves two purposes: it is a starting place for those new to the industry and an extension for those who have been navigating the terminology landscape for a while. The Governance Institute publishes an update every two years to keep pace with new acronyms and terms that make it into boardrooms.

# ACRONYMS

<b>AAFP</b>	American Academy of Family Physicians
<b>AAHC</b>	Association of Academic Health Centers
<b>AAPCC</b>	Adjusted average per capita cost
<b>AAPPO</b>	American Association of Preferred Provider Organizations
<b>AAPS</b>	Association of American Physicians and Surgeons
<b>AARP</b>	American Association of Retired Persons
<b>ABA</b>	American Bar Association
<b>ABHW</b>	Association for Behavioral Health and Wellness
<b>ABMS</b>	American Board of Medical Specialties
<b>ACA</b>	Affordable Care Act (also known as the Patient Protection and Affordable Care Act, PPACA)
<b>ACC</b>	American College of Cardiology
<b>ACCME</b>	Accreditation Council for Continuing Medical Education
<b>ACE</b>	Acute care episodes
<b>ACGME</b>	Accreditation Council for Graduate Medical Education
<b>ACHCA</b>	American College of Health Care Administrators
<b>ACHE</b>	American College of Healthcare Executives
<b>ACM</b>	Appropriate care measure
<b>ACO</b>	Accountable care organization
<b>ACOG</b>	American College of Obstetricians and Gynecologists
<b>ACP</b>	American College of Physicians
<b>ACPE</b>	American College of Physician Executives
<b>ACS</b>	American Cancer Society
<b>ACS</b>	American College of Surgeons
<b>ADA</b>	Americans with Disabilities Act
<b>ADC</b>	Average daily census
<b>ADE</b>	Adverse drug event
<b>ADL</b>	Activities of daily living
<b>ADR</b>	Adverse drug reaction
<b>ADS</b>	Alternative delivery system
<b>AFL-CIO</b>	American Federation of Labor and Congress of Industrial Organizations
<b>AFMR</b>	American Federation for Medical Research
<b>AG</b>	Attorney General
<b>AHA</b>	American Heart Association
<b>AHA</b>	American Hospital Association
<b>AHC</b>	Accountable Health Communities
<b>AHIMA</b>	American Health Information Management Association
<b>AHIP</b>	America's Health Insurance Plans
<b>AHLA</b>	American Health Lawyers Association

<b>AHP</b>	Allied health professional
<b>AHP</b>	Association for Healthcare Philanthropy
<b>AHQQA</b>	American Health Quality Association
<b>AHRQ</b>	Agency for Healthcare Research and Quality
<b>AHSR</b>	Association for Health Services Research
<b>AIDS</b>	Acquired immune deficiency syndrome
<b>ALA</b>	American Lung Association
<b>ALM</b>	Asset and liability management
<b>ALOS</b>	Average length of stay (see LOS)
<b>AMA</b>	American Medical Association
<b>AMC</b>	Academic medical center
<b>AMGA</b>	American Medical Group Association
<b>AMI</b>	Acute myocardial infarction (heart attack)
<b>AMSA</b>	American Medical Student Association
<b>ANA</b>	American Nurses Association
<b>ANSI</b>	American National Standards Institute
<b>AOA</b>	American Osteopathic Association
<b>AONE</b>	American Organization of Nurse Executives
<b>A/P</b>	Accounts payable
<b>APA</b>	American Psychiatric Association
<b>APA</b>	American Psychological Association
<b>APC</b>	Ambulatory payment classification
<b>APHA</b>	American Public Health Association
<b>APM</b>	Alternative Payment Model
<b>APRN</b>	Advanced Practice Registered Nurse
<b>APS</b>	American Pain Society
<b>A/R</b>	Accounts receivable
<b>ARC</b>	AIDS (acquired immune deficiency syndrome) related complex/ conditions
<b>ARRA</b>	American Recovery and Reinvestment Act of 2009
<b>ARS</b>	Auction-rate security
<b>ASAE</b>	American Society of Association Executives
<b>ASCA</b>	Ambulatory Surgery Center Association
<b>ASCO</b>	American Society of Clinical Oncology
<b>ASCP</b>	American Society of Clinical Pathology
<b>ASH</b>	American Society of Hematology
<b>ASIM</b>	American Society of Internal Medicine
<b>ASO</b>	Administrative services only contract
<b>ATS</b>	Alcohol Treatment Services
<b>AV</b>	Actuarial value
<b>AWI</b>	Adjusted wage index
<b>BBA</b>	Balanced Budget Act of 1997

<b>BBRA</b>	Balanced Budget Refinement Act of 1999
<b>BC/BS</b>	Blue Cross/Blue Shield
<b>BHP</b>	Basic Health Program
<b>BLS</b>	Basic life support
<b>BME</b>	Board of Medical Examiners
<b>BMQA</b>	Board of Medical Quality Assurance
<b>BOD</b>	Board of directors
<b>BPCI</b>	Bundled Payments for Care Improvement
<b>Bx</b>	Biopsy
<b>CABG</b>	Coronary artery bypass graft
<b>CAE</b>	Certified Association Executive
<b>CAH</b>	Critical access hospital
<b>CAHPS®</b>	Consumer Assessment of Healthcare Providers and Systems (formerly Consumer Assessment of Health Plans Study; see also HCAHPS®)
<b>CaIPERS</b>	California Public Employees Retirement System
<b>CAMH</b>	<i>Comprehensive Accreditation Manual for Hospitals</i> (The Joint Commission)
<b>CAPC</b>	Center to Advance Palliative Care
<b>CAPP</b>	Council of Accountable Physician Practices
<b>CAT</b>	Computerized axial tomography
<b>CBO</b>	Congressional Budget Office
<b>CC</b>	Complications and co-morbidities (see MCC)
<b>CCIIO</b>	Center for Consumer Information and Insurance Oversight
<b>CCR</b>	Cost coverage ratio or cost to charge ratio
<b>CCTP</b>	Community-Based Care Transitions Program
<b>CCU</b>	Critical care unit (also intensive care unit, or ICU)
<b>CCU</b>	Cardiac care unit
<b>CDC</b>	Centers for Disease Control and Prevention
<b>CDHP</b>	Consumer-driven health plan
<b>CDS</b>	Clinical Documentation Specialist
<b>CEC</b>	Comprehensive ESRD Care
<b>CER</b>	Comparative effectiveness research
<b>CfC</b>	Conditions for Coverage (CMS)
<b>CFO</b>	Chief Financial Officer
<b>CFRE</b>	Certified Fund Raising Executive
<b>CHA</b>	Catholic Health Association
<b>CHC</b>	Community health center
<b>CHF</b>	Congestive heart failure
<b>CHIP</b>	Children's Health Insurance Program
<b>CHOW</b>	Change of ownership
<b>CI</b>	Clinical integration
<b>CIN</b>	Clinically integrated network

<b>CIO</b>	Chief Information Officer
<b>CJR</b>	Comprehensive Care for Joint Replacement
<b>CLABSI</b>	Central line-associated bloodstream infection
<b>CM</b>	Case manager
<b>CME</b>	Continuing medical education
<b>CMI</b>	Case mix index
<b>CMMI</b>	Center for Medicare and Medicaid Innovation
<b>CMO</b>	Chief Medical Officer
<b>CMP</b>	Civil monetary penalty
<b>CMS</b>	Centers for Medicare and Medicaid Services
<b>CMWF</b>	The Commonwealth Fund
<b>CNO</b>	Chief Nursing Officer
<b>COB</b>	Coordination of benefits
<b>COBRA</b>	Consolidated Omnibus Budget Reconciliation Act of 1985
<b>COE</b>	Center of excellence
<b>COI</b>	Conflict of interest
<b>COLA</b>	Cost of living adjustment
<b>CON</b>	Certificate of need
<b>CO-OP</b>	Consumer Operated and Oriented Plan
<b>CoP</b>	Conditions of Participation (Medicare)
<b>COPD</b>	Chronic obstructive pulmonary disease
<b>COS</b>	Chief of Staff
<b>COTH</b>	Council of Teaching Hospitals
<b>CPA</b>	Certified Public Accountant
<b>CPC+</b>	Comprehensive Primary Care Plus
<b>CPG</b>	Clinical practice guidelines
<b>CPHQ</b>	Certified Professional in Healthcare Quality
<b>CPI</b>	Consumer Price Index
<b>CPIA</b>	Clinical practice improvement activities
<b>CPOE</b>	Computer physician (or provider) order entry
<b>CPR</b>	Cardiopulmonary resuscitation
<b>CPT</b>	Physicians' current procedural terminology
<b>CQI</b>	Continuous quality improvement
<b>CQM</b>	Clinical quality measure
<b>CQO</b>	Chief Quality Officer
<b>CQuiPS</b>	Center for Quality Improvement and Patient Safety
<b>CR</b>	Cardiac rehabilitation
<b>CT</b>	Computerized tomography
<b>CVD</b>	Cardiovascular disease
<b>CXO</b>	Chief Experience Officer
<b>D&amp;O</b>	Directors and officers (insurance)
<b>DGME</b>	Direct graduate medical education

<b>DME</b>	Durable medical equipment
<b>D.N.</b>	Doctorate of Nursing
<b>DNA</b>	Deoxyribonucleic acid
<b>DNR</b>	Do not resuscitate order
<b>DNV GL</b>	Det Norske Veritas and Germanischer Lloyd (hospital accreditation; see also NIAHO)
<b>D.O.</b>	Doctor of Osteopathic Medicine
<b>DOA</b>	Dead on arrival
<b>DOH</b>	Department of Health
<b>DOJ</b>	Department of Justice
<b>DOL</b>	Department of Labor
<b>DRG</b>	Diagnosis related group
<b>Dr.P.H.</b>	Doctor of Public Health
<b>DSH</b>	Disproportionate share hospital
<b>DUR</b>	Drug utilization review
<b>Dx</b>	Diagnosis
<b>EAP</b>	Employee Assistance Program
<b>EBM</b>	Evidence-based medicine
<b>EBRI</b>	Employee Benefit Research Institute
<b>ECF</b>	Extended care facility
<b>ECG</b>	Electrocardiography (also EKG)
<b>ECP</b>	Essential community provider
<b>ECU</b>	Extended care unit
<b>ED</b>	Emergency department
<b>EDI</b>	Electronic data interchange
<b>EEG</b>	Electroencephalography
<b>EEO</b>	Equal employment opportunity
<b>EFT</b>	Electronic funds transfer
<b>EHB</b>	Essential health benefits
<b>EHR</b>	Electronic health record
<b>EHR</b>	Evidence-based hospital referral
<b>eICUs</b>	Electronic intensive care units
<b>EKG</b>	Electrocardiography (also ECG)
<b>ELSI</b>	Ethical, Legal, and Social Implications Research Program
<b>EMG</b>	Electromyography
<b>EMR</b>	Electronic medical record
<b>EMS</b>	Emergency medical services
<b>EMT</b>	Emergency medical technician
<b>EMTALA</b>	Emergency Medical Treatment and Labor Act
<b>ENT</b>	Ear, nose, and throat
<b>EOB</b>	Explanation of benefits
<b>EOC</b>	Emergency operations center

<b>EOC</b>	Evidence of coverage
<b>EPA</b>	Environmental Protection Agency
<b>EPM</b>	Episode payment model
<b>EPO</b>	Exclusive provider organization
<b>EPSDT</b>	Early and periodic screening, diagnosis, and treatment
<b>ER</b>	Emergency room (also ED, emergency department)
<b>ERISA</b>	Employee Retirement Income Security Act
<b>ERM</b>	Enterprise risk management
<b>ESRD</b>	End-stage renal disease
<b>F&amp;A</b>	Fraud and abuse
<b>FACEP</b>	Fellow, American College of Emergency Physicians
<b>FACHE</b>	Fellow, American College of Healthcare Executives
<b>FACOG</b>	Fellow, American College of Obstetricians and Gynecologists
<b>FACP</b>	Fellow, American College of Physicians
<b>FACS</b>	Fellow, American College of Surgeons
<b>FAH</b>	Federation of American Hospitals
<b>FASB</b>	Financial Accounting Standards Board
<b>FCA</b>	False Claims Act
<b>FDA</b>	Food and Drug Administration
<b>FEHBP</b>	Federal Employee Health Benefits Plan
<b>FEMA</b>	Federal Emergency Management Agency
<b>FFS</b>	Fee-for-service
<b>FICA</b>	Federal Insurance Contribution Act
<b>FMAP</b>	Federal medical assistance percentage
<b>FNP</b>	Family Nurse Practitioner
<b>FP</b>	Family practice or practitioner
<b>FPL</b>	Federal poverty level
<b>FQHC</b>	Federally qualified health center
<b>FQHMO</b>	Federally qualified health maintenance organization
<b>FSA</b>	Flexible spending account
<b>FTC</b>	Federal Trade Commission
<b>FTE</b>	Full-time equivalent
<b>FY</b>	Fiscal year
<b>FYE</b>	Fiscal year end/ending
<b>GAAP</b>	Generally accepted accounting principles
<b>GAO</b>	Government Accountability Office (U.S.; formerly General Accounting Office)
<b>GDP</b>	Gross domestic product
<b>GME</b>	Graduate medical education
<b>GNP</b>	Gross national product
<b>GP</b>	General practitioner
<b>GPO</b>	Group purchasing organization

<b>GPWW</b>	Group Practice Without Walls
<b>GSA</b>	Group service agreement
<b>GYN</b>	Gynecology or gynecologist
<b>H1N1</b>	Influenza A virus, subtype (also “swine” influenza)
<b>HAC</b>	Hospital-acquired condition
<b>HCAHPS®</b>	Hospital Consumer Assessment of Healthcare Providers and Systems (see also CAHPS®)
<b>HCBS</b>	Home and community-based services
<b>HCERA</b>	Health Care and Education Reconciliation Act of 2010
<b>HCFAC</b>	Health Care Fraud and Abuse Control
<b>HCI</b>	Hospital Care Intensity Index (The Dartmouth Atlas of Health Care)
<b>HCQIA</b>	Health Care Quality Improvement Act
<b>HDHP</b>	High-deductible health plan
<b>HDL</b>	High-density lipoprotein (“good cholesterol”)
<b>HEDIS</b>	Healthcare Effectiveness Data and Information Set
<b>HFAP</b>	Healthcare Facilities Accreditation Program
<b>HFMA</b>	Healthcare Financial Management Association
<b>HGP</b>	Human Genome Project
<b>HHA</b>	Home Health Agency
<b>HHS</b>	U.S. Department of Health and Human Services
<b>HIE</b>	Health Information Exchange
<b>HIINs</b>	Hospital Improvement Innovation Networks
<b>HIMSS</b>	Healthcare Information and Management Systems Society
<b>HIN</b>	Health information network (also known as regional health information organization, or RHIO)
<b>HIOS</b>	Health Insurance Oversight System
<b>HIPAA</b>	Health Insurance Portability and Accountability Act of 1996
<b>HIPC</b>	Health insurance purchasing cooperative
<b>HIT</b>	Health information technology
<b>HITECH</b>	Health Information Technology for Economic and Clinical Health Act
<b>HIV</b>	Human immunodeficiency virus
<b>HIX</b>	Health insurance exchange
<b>HLE</b>	Health life expectancy
<b>HMO</b>	Health maintenance organization
<b>HPSA</b>	Health professional shortage area
<b>HQA</b>	Hospital Quality Alliance
<b>HQID</b>	Hospital Quality Incentive Demonstration (CMS/Premier)
<b>HRA</b>	Health risk assessment
<b>HRET</b>	Health Research and Educational Trust
<b>HRQOL</b>	Health-related quality of life
<b>HRSA</b>	Health Resources and Services Administration
<b>HSA</b>	Health savings account

<b>HSMR</b>	Hospital standardized mortality rate
<b>ICD</b>	Implantable cardioverter defibrillator
<b>ICD-10</b>	International Classification of Diseases, 10th Revision
<b>ICU</b>	Intensive care unit
<b>IDS</b>	Integrated delivery system
<b>IEC</b>	Independent ethics committee (also called institutional review board, or IRB)
<b>IHF</b>	International Hospital Federation
<b>IHI</b>	Institute for Healthcare Improvement
<b>IHS</b>	Integrated health system
<b>IM</b>	Internal medicine
<b>IME</b>	Indirect medical education
<b>INS</b>	Immigration and Naturalization Service
<b>IOM</b>	Institute of Medicine
<b>I/P</b>	Inpatient
<b>IPA</b>	Independent practice association
<b>IPAB</b>	Independent payment advisory board
<b>IPPS</b>	Inpatient prospective payment system
<b>IQR</b>	Hospital Inpatient Quality Reporting Program
<b>IRB</b>	Institutional review board (also called independent ethics committee, or IEC)
<b>IRF</b>	Inpatient rehabilitation facility
<b>IRS</b>	Internal Revenue Service
<b>ISO</b>	International Organization for Standardization* (See the entry in the terms section for more on ISO and the ISO 9000 family of standards.)
<b>IT</b>	Information technology (also called information systems, or IS)
<b>JAMA</b>	<i>Journal of the American Medical Association</i>
<b>JOA</b>	Joint operating agreement
<b>JOC</b>	Joint operating company
<b>JV</b>	Joint venture
<b>KFF</b>	Kaiser Family Foundation
<b>LOI</b>	Letter of intent
<b>LOS</b>	Length of stay
<b>LTAC</b>	Long-term acute care

\*Many people ask, “Shouldn’t it be IOS?” In fact, it is not an acronym. “ISO” is a word, derived from the Greek “iso-” that occurs in terms such as “isometric” (of equal measure or dimension). To avoid a plethora of acronyms resulting from the translation into different national languages of members; e.g., IOS in English, OIN in French (from Organisation internationale de normalisation), whatever the country, it is always ISO.

<b>LTC</b>	Long-term care
<b>LTCF</b>	Long-term care facility
<b>LTD</b>	Long-term disability
<b>LTSS</b>	Long-term services and supports
<b>LUPA</b>	Low utilization payment adjustment
<b>LVN</b>	Licensed vocational nurse
<b>M&amp;A</b>	Mergers and acquisitions
<b>MA</b>	Medicare Advantage
<b>MAC</b>	Medicare administrative contractor
<b>MACPAC</b>	Medicaid and CHIP Payment Access Commission
<b>MACRA</b>	Medicare Access and CHIP Reauthorization Act
<b>MAGI</b>	Modified adjusted gross income
<b>MAP</b>	Medical audit program
<b>MB</b>	Market basket
<b>MBWA</b>	Management by walking around
<b>MCC</b>	Major complications and co-morbidities (CMS diagnosis code; see CC)
<b>MCO</b>	Managed care organization
<b>M.D.</b>	Doctor of (Allopathic) Medicine
<b>MEC</b>	Medical executive committee
<b>MedPAC</b>	Medicare Payment Advisory Commission
<b>MER</b>	Medication Errors Reporting Program (usually MER Program)
<b>MFCU</b>	Medicaid Fraud Control Unit
<b>MFS</b>	Medicare fee schedule
<b>MGCRB</b>	Medicare Geographic Classification Review Board
<b>MGMA</b>	Medical Group Management Association
<b>M.H.A.</b>	Master of Health Administration
<b>MI</b>	Myocardial infarction (heart attack; also acute myocardial infarction, or AMI)
<b>MIA</b>	Medically indigent adult
<b>MIPS</b>	Merit-Based Incentive Payment System
<b>MIS</b>	Management information system
<b>MLR</b>	Medical loss ratio
<b>MMA</b>	Medicare Prescription Drug, Improvement, and Modernization Act of 2003
<b>MMR</b>	Measles, mumps, rubella (vaccine)
<b>MMSEA</b>	Medicare, Medicaid, and S-CHIP Extension Act of 2007
<b>MOB</b>	Medical office building
<b>MOH</b>	Ministry of Health
<b>M.P.H.</b>	Master of Public Health
<b>MRI</b>	Magnetic resonance imaging
<b>MRSA</b>	Methicillin-resistant Staphylococcus aureus

<b>MS-DRG</b>	Medicare severity-diagnosis related group (formerly DRG; see entry in the terms section)
<b>MSA</b>	Metropolitan statistical area
<b>MSG</b>	Multi-specialty group
<b>M.S.N.</b>	Master of Science in Nursing
<b>MSO</b>	Management services organization
<b>MSP</b>	Medical services professional
<b>MSP</b>	Medicare secondary payer
<b>MSSP</b>	Medicare Shared Savings Program
<b>MSW</b>	Medical social worker
<b>MUA</b>	Medically underserved area
<b>NACHGR</b>	National Advisory Council for Human Genome Research
<b>NAHMOR</b>	National Association of HMO Regulators
<b>NAHQ</b>	National Association for Healthcare Quality
<b>NAIC</b>	National Association of Insurance Commissioners
<b>NAMSS</b>	National Association of Medical Staff Services
<b>NAPH</b>	National Association of Public Hospitals and Health Systems
<b>NAS</b>	National Academy of Sciences
<b>NBCH</b>	National Business Coalition on Health
<b>NBGH</b>	National Business Group on Health (formerly the Washington Business Group on Health, or WBGH)
<b>NBME</b>	National Board of Medical Examiners
<b>NCCAM</b>	National Center for Complementary and Alternative Medicine
<b>NCHS</b>	National Center for Health Statistics
<b>NCI</b>	National Cancer Institute
<b>NCID</b>	National Center for Infectious Diseases
<b>NCMHD</b>	National Center on Minority Health and Health Disparities
<b>NCQA</b>	National Committee for Quality Assurance
<b>NCQHC</b>	National Committee for Quality Health Care
<b>NCVHS</b>	National Committee on Vital and Health Statistics
<b>NDNQI</b>	National Database of Nursing Quality Indicators
<b>NEJM</b>	<i>New England Journal of Medicine</i>
<b>NF</b>	Nursing facility
<b>NGO</b>	Non-governmental organization
<b>NHGRI</b>	National Human Genome Research Institute
<b>NHLBI</b>	National Heart, Lung, and Blood Institute
<b>NHPF</b>	National Health Policy Forum
<b>NHS</b>	National Health Service (United Kingdom)
<b>NIA</b>	National Institute on Aging
<b>NIAHO</b>	National Integrated Accreditation for Healthcare Organizations (see also DNV GL)
<b>NIAMS</b>	National Institutes of Arthritis and Musculoskeletal and Skin Diseases

<b>NICU</b>	Neonatal Intensive Care Unit

<b>ONC</b>	Office of the National Coordinator for Health Information Technology
<b>OON</b>	Out-of-network
<b>OOP</b>	Out-of-pocket (payments)
<b>O/P</b>	Outpatient
<b>OPC</b>	Outpatient clinic
<b>OPPS</b>	Outpatient prospective payment system
<b>OR</b>	Operating room
<b>OSG</b>	Office of the Surgeon General
<b>OSHA</b>	Occupational Safety and Health Administration
<b>OTC</b>	Over the counter (drug)
<b>P&amp;L</b>	Profit and loss
<b>P4P</b>	Pay-for-performance
<b>PA</b>	Physician Assistant
<b>PAC</b>	Post-acute care
<b>PBT</b>	Participating tax-exempt bond transaction
<b>PCIP</b>	Pre-Existing Condition Insurance Plan
<b>PCLC</b>	Palliative Care Leadership Centers
<b>PCMH</b>	Patient-centered medical home

<b>PCN</b>	Primary care network
<b>PCORI</b>	Patient-Centered Outcomes Research Institute
<b>PCP</b>	Primary care physician (or provider)
<b>PET</b>	Positron emission tomography
<b>PFFPM</b>	Physician-focused payment model
<b>PFS</b>	Physician fee schedule
<b>Pharm.D.</b>	Doctor of Pharmacy
<b>Ph.D.</b>	Doctor of Philosophy
<b>PHM</b>	Population health management
<b>PHO</b>	Physician–hospital organization
<b>PHR</b>	Personal health record
<b>PhRMA</b>	Pharmaceutical Research and Manufacturers of America
<b>PHS</b>	Public health services
<b>PI</b>	Program integrity
<b>PICU</b>	Pediatric intensive care unit
<b>MPPM</b>	Per member per month
<b>POA</b>	Present on admission (indicates whether someone comes to the hospital with an existing condition)
<b>POC</b>	Process of care
<b>POS</b>	Point of service
<b>PP&amp;E</b>	Property, plant, and equipment
<b>PPACA</b>	Patient Protection and Affordable Care Act of 2010 (also referred to as the Affordable Care Act, ACA)
<b>PPI</b>	Producer Price Index
<b>PPO</b>	Preferred provider organization
<b>PPS</b>	Prospective payment system
<b>PQI</b>	Prevention Quality Indicator
<b>PQRI</b>	Physician Quality Reporting Initiative
<b>PQRS</b>	Physician Quality Reporting System
<b>PRN</b>	As (often as) or if necessary
<b>PRO</b>	Peer review organization
<b>PRRB</b>	Provider Reimbursement Review Board
<b>PSI</b>	Patient safety indicators
<b>PSO</b>	Patient safety organization
<b>PSQIA</b>	Patient Safety and Quality Improvement Act
<b>PSWP</b>	Patient safety work product
<b>PT</b>	Physical therapy/therapist
<b>PTAC</b>	Physician-Focused Payment Model Technical Advisory Committee
<b>QA</b>	Quality assurance
<b>QC</b>	Quality control
<b>QCDR</b>	Qualified clinical data registry
<b>QHP</b>	Qualified health plan

<b>QI</b>	Quality improvement
<b>QIO</b>	Quality improvement organization
<b>QM</b>	Quality management
<b>QPP</b>	Quality Payment Program
<b>QPS</b>	Quality and patient safety
<b>QR</b>	Quality review
<b>RAC</b>	Recovery audit contractor (Medicare)
<b>RBRVS</b>	Resource-based relative value scale
<b>REIT</b>	Real estate investment trust
<b>RFP</b>	Request for proposal
<b>RHIO</b>	Regional health information organization
<b>RHQDAPU</b>	Hospital inpatient quality reporting program (no longer an acronym; formerly reporting hospital quality data for annual payment update [Medicare])
<b>RICO</b>	Racketeer Influenced and Corrupt Organization Act
<b>RM</b>	Risk management
<b>RN</b>	Registered nurse
<b>ROA</b>	Return on assets
<b>ROE</b>	Return on equity
<b>ROI</b>	Return on investment
<b>RRC</b>	Rural referral center
<b>RRT</b>	Rapid response team
<b>RUG</b>	Resource utilization group
<b>RVU</b>	Relative value unit
<b>RWJF</b>	Robert Wood Johnson Foundation
<b>Rx</b>	Prescription
<b>S&amp;P</b>	Standard & Poor's
<b>SAMHSA</b>	Substance Abuse and Mental Health Services Administration
<b>SARS</b>	Severe acute respiratory syndrome
<b>SBC</b>	Summary of benefits and coverage
<b>SCH</b>	Sole community hospital
<b>SCHIP</b>	State Children's Health Insurance Program
<b>SEC</b>	Securities and Exchange Commission
<b>SEIU</b>	Service Employees International Union
<b>SG</b>	Surgeon General
<b>SGR</b>	Sustainable growth rate
<b>SHCC</b>	State/Statewide Health Coordinating Council
<b>SHFFT</b>	Surgical hip/femur fracture treatment
<b>SHIP</b>	State Health Insurance Assistance Program
<b>SHOP</b>	Small Business Health Options Program
<b>SIBR</b>	Structured interdisciplinary bedside rounds
<b>SICU</b>	Surgical intensive care unit

<b>SNF</b>	Skilled nursing facility
<b>SOA</b>	Sarbanes-Oxley Act of 2002 (also SOX)
<b>SSP</b>	Shared Savings Program
<b>STAT</b>	Sooner than already there, or immediately (from the Latin <i>statim</i> )
<b>T&amp;E</b>	Travel & expense
<b>TCM</b>	Transitional care management
<b>TPA</b>	Third-party administrator
<b>TQI/TQM</b>	Total quality improvement/management
<b>UBI</b>	Unrelated business income
<b>UCR</b>	Usual, customary, and reasonable (charges)
<b>UM/UR</b>	Utilization management/review
<b>URAC</b>	Utilization Review Accreditation Commission (now known as URAC)
<b>USPSTF</b>	U.S. Preventative Services Task Force
<b>VA</b>	Veterans Administration/Affairs
<b>VBID</b>	Value-Based Insurance Design
<b>VBP</b>	Value-based purchasing
<b>VBR</b>	Value-based reimbursement
<b>VNAA</b>	Visiting Nurse Associations of America
<b>VPMA</b>	Vice President of Medical Affairs
<b>WHI</b>	Women's Health Initiative
<b>WHO</b>	World Health Organization
<b>WIC</b>	Women, Infants, and Children (a federal assistance program)
<b>WKKF</b>	W.K. Kellogg Foundation
<b>WNV</b>	West Nile virus
<b>WRGH</b>	Wye River Group on Healthcare
<b>YTD</b>	Year-to-date
<b>ZEBRA</b>	Zero balanced reimbursement account

## GLOSSARY OF TERMS

### **5 Million Lives Campaign**

An extension of the Institute for Healthcare Improvement's (IHI's) 100,000 Lives Campaign, with the goal of saving 5 million lives from unnecessary harm from hospital care over a period of 24 months (December 2006–December 2008). The campaign focused on 12 interventions: 1) prevent pressure ulcers, 2) reduce methicillin-resistant *Staphylococcus aureus* (MRSA) infection, 3) prevent harm from high-alert medications, 4) reduce surgical complications, 5) deliver reliable, evidence-based care for congestive heart failure, 6) get boards on board, 7) deploy rapid response teams, 8) prevent adverse drug events (medication reconciliation), 9) improve care for acute myocardial infarction, 10) prevent surgical site infections, 11) prevent central line-associated bloodstream infections, and 12) prevent ventilator-associated pneumonia.

### **Access**

The ability to obtain healthcare services, including cost, transportation, location, and hours of operation.

### **Accountable care organization**

A set of providers that have the ability to manage the full continuum of care for the patients within their provider network and that receive financial incentives to improve the quality and efficiency of care. These providers share in both incentive payments and penalties, thereby accepting joint responsibility for the quality and cost of healthcare services provided to Medicare patients. (For specific ACO models, see *Comprehensive ESRD Care Model*, *Medicare Shared Savings Program*, *Next Generation ACO Model*, and *Pioneer ACO*.)

### **Accountable Health Communities (AHC) model**

A model created by the Center for Medicare & Medicaid Innovation that addresses the gap between clinical care and community services in the healthcare delivery system. Over a five-year period, the AHC model will test whether increased awareness of and access to services addressing health-related social needs will impact total healthcare costs and improve health and quality of care for Medicare and Medicaid beneficiaries in targeted communities.

### **Accreditation**

A judgment made by a professional society or other recognized organization that a healthcare provider substantially meets appropriate standards of care.

### **Accrual accounting**

Accounting method that recognizes revenues as services are rendered, independent of the time the cash is actually received.

**ACE demonstration project**

A three-year bundled payment demonstration project developed by CMS that encompassed five hospitals in the Southwest. The ACE demonstration project began in January 2009 and included paying bundled rates specifically for 28 cardiovascular and nine orthopedic DRGs, with other diseases also considered. ACE combined the Medicare Part A and Part B payments for hospitals and physicians into a single payment, which the providers shared. By sharing the payment and potential risk pool, physicians and hospitals worked together to ensure the most efficient care was delivered at the highest quality.

**Acid test (quick ratio)**

A financial ratio designed to measure the relationship between “quick” assets (cash, marketable securities, accounts receivable) to current liabilities; an important measure of liquidity.

**ACO Investment Model**

An initiative developed by the Center for Medicare & Medicaid Innovation for organizations participating as ACOs in the Medicare Shared Savings Program. This is a model of pre-paid shared savings that builds on the experience with the Advance Payment ACO Model. This model will test the use of pre-paid shared savings to encourage new ACOs to form in rural and underserved areas and to encourage current Medicare Shared Savings Program ACOs to transition to arrangements with greater financial risk. (Also see *accountable care organization*.)

**Activities of daily living (ADL)**

Tasks people can do on their own without help.

**Actuarial equivalent**

Used to measure whether two or more health benefit plans have the same value.

**Actuarial value**

The percentage of total average costs for covered benefits that a health plan will cover. The Affordable Care Act established four levels of coverage based on the concept of actuarial value. As plans increase in actuarial value (bronze, silver, gold, and platinum) they cover a greater share of enrollees’ medical expenses overall.

**Actuary**

An accredited insurance professional who calculates predictable health risks, rates, and premium costs.

**Acute care**

Health services designed to meet the needs of patients requiring short-term care for a period of 30 days or less.

**Adjusted admissions**

The sum of inpatient admissions and equivalent admissions based on the provision of outpatient services. Equivalent admissions are derived by multiplying inpatient admissions by the ratio of outpatient to inpatient revenue.

**Admitting privileges**

The authorization a board of directors gives to a provider, based on his or her license, education, training, and experience, to admit patients to a particular hospital to provide patient care.

**Advance Payment ACO Model**

An initiative developed by the Center for Medicare & Medicaid Innovation for organizations participating as ACOs in the Medicare Shared Savings Program. This model is designed for smaller entities or those with less access to capital such as physician-based and rural providers that would like to come together voluntarily to give coordinated high-quality care to the Medicare patients they serve. Through this model, selected participants receive upfront and monthly payments, which they can use to make important investments in their care coordination infrastructure. These payments are then repaid through the future shared savings they earn. (Also see *accountable care organization*.)

**Adverse selection**

The tendency of people who are in poorer-than-average health to apply for insurance coverage.

**Affordable Care Act (ACA)**

See *Patient Protection and Affordable Care Act of 2010*.

**Agency for Healthcare Research and Quality (AHRQ)**

A government agency that supports and conducts research that evaluates the effectiveness, quality, and value of healthcare in everyday settings, uncovering the evidence and developing the knowledge and tools that yield measurable improvements in quality.

**“All or none” measurement**

Also called “perfect care,” it means a patient must receive all the care (e.g., procedures and treatments) indicated in a specified protocol. If a patient receives all processes in a specific protocol, he/she has received “all;” if the patient receives anything less than all processes in the protocol, he/she has received “none.”

**Allowable charges (or costs)**

The costs insurers will pay.

**Alternative Payment Models (APMs)**

One of two new payment formula options for physicians and other clinicians under MACRA that incentivize quality and value. Clinicians who meet the criteria for APM

incentive payments do not receive a payment adjustment under the Merit-Based Incentive Payment System (MIPS). Instead, starting in 2019, those in the most highly advanced APMs receive a 5 percent Medicare Part B incentive payment. CMS will provide a list of care models each year that qualify for APM incentive payments. (Also see *Medicare Access and CHIP Reauthorization Act* and *Merit-Based Incentive Payment System*.)

### **Ambulatory care**

Healthcare services that do not require overnight or inpatient care.

### **Ambulatory surgery center (ASC)**

Outpatient center that provides surgical procedures that do not require an overnight stay.

### **American Osteopathic Association (AOA)**

The primary certifying board for osteopathic physicians (D.O.s) and the accreditation agency for all osteopathic medical colleges and healthcare facilities. Through its Healthcare Facilities Accreditation Program (HFAP), it has deeming authority from CMS to conduct accreditation surveys of acute care hospitals (not only osteopathic hospitals). (See *Healthcare Facilities Accreditation Program*.)

### **American Recovery and Reinvestment Act of 2009 (ARRA)**

Economic stimulus package created to increase jobs, spur economic activity and invest in long-term growth, and foster unprecedented levels of accountability and transparency in government spending. This act, also known as the Recovery Act, put a total of about \$150 billion into healthcare in order to support comparative effectiveness research, accelerate the adoption of health information technology, promote prevention and wellness, strengthen scientific research and facilities, improve children and community services, and improve information technology security.

### **Anti-kickback statute**

A provision of the Social Security Act that forbids any knowing and willful conduct involving the solicitation, receipt, offer, or payment of any kind of remuneration in return for referring an individual for any Medicaid- or Medicare-covered item or service or for recommending or arranging the purchase, lease, or order of an item or service that may be wholly or partially paid for through the Medicare or Medicaid programs. Violation of the anti-kickback provision can result in a fine of up to \$25,000 for each violation and/or imprisonment for up to five years. The law also mandates exclusion or suspension from government healthcare programs following a conviction under this statute. Note that the anti-kickback statute requires knowledge of wrongdoing whereas the Stark laws do not. (See *Stark law & regulations*.)

### **Anti-kickback statute safe harbors**

Caveats that protect certain arrangements from prosecution under the anti-kickback statute, and address a broad range of topics including: investments in underserved areas; practitioner recruitment in underserved areas; obstetrical malpractice

insurance subsidies for underserved areas; sales of physician practices to hospitals in underserved areas; investments in ambulatory surgical centers; investments in group practices; referral arrangements for specialty services; and cooperative hospital service organizations. The Office of Inspector General has published 21 regulatory safe harbors: 11 in 1991, two in 1992, and eight in 1999. (See *safe harbor*.)

### **Assisted living**

Housing, supportive services, personalized assistance, and healthcare designed to respond to the unique needs of individuals who need assistance with activities of daily living.

### **Auction-rate security (ARS)**

A debt instrument (corporate or municipal bond) with a long-term nominal maturity for which the interest rate is regularly reset through a dutch auction. It could also refer to a preferred stock for which the dividend is reset through the same process. In the dutch auction, broker-dealers submit bids on behalf of potential buyers and sellers of the bond. Based on the submitted bids, the auction agent will set the next interest rate as the lowest rate to match supply and demand. Since ARS holders do not have the right to put their securities back to the issuer, no bank liquidity facility is required.

### **Balanced Budget Act of 1997 (BBA or BBA 97)**

Legislation that was part of a plan to balance the federal budget by 2002. It included \$112 billion from slowing the growth of the Medicare program and \$7 billion from changes to Medicaid, and provided Medicare beneficiaries with additional choices for care through private health plans. To control spending on services already paid prospectively, such as the services provided by hospital inpatient departments, the act reduced payment updates in relation to what they would have been. To control spending on services that had been reimbursed largely on the basis of costs or charges, such as those provided by hospital outpatient departments, skilled nursing facilities, and home health agencies, the act established new prospective payment systems. To control spending and to expand beneficiaries' choices of private health plans, the law also created the Medicare+Choice program, which allows new types of plans to participate, and established new payment rules that raised payments to plans in some areas, lowered them in others, and capped the growth in payments at less than the growth in fee-for-service spending.

### **Balanced Budget Refinement Act of 1999 (BBRA)**

Legislation that restored some of the funding that was cut under the BBA, including modification of Medicare's payment rates for services including those furnished by hospitals, skilled nursing facilities, home health agencies, physicians, physical and speech therapists, occupational therapists, and managed care plans.

### **Balanced scorecard**

A tool that translates an organization's mission and strategy into a comprehensive set of performance measures that provides the framework for a strategic measurement and management system. Developed in the early 1990s by Robert Kaplan and

David Norton, it includes four perspectives: the Learning and Growth perspective, the Business Process perspective, the Customer perspective, and the Financial perspective, and organizations must develop metrics, collect data, and analyze it relative to each of these perspectives.

### **Basic Health Program**

A health benefits coverage program for low-income residents who would otherwise be eligible to purchase coverage through the Health Insurance Marketplace. The Basic Health Program gives states the ability to provide more affordable coverage for these low-income residents and improve continuity of care for people whose income fluctuates above and below Medicaid and Children's Health Insurance Program levels.

### **Benchmark**

A quantifiable measure that serves as a standard by which others may be measured or judged. Dashboards normally include benchmarks of competing organizations at a local, state, and nationwide basis, and also internal benchmarks showing the organization's improvement on its own. The caution about using healthcare benchmarks is that much so-called "benchmark" data available are essentially averages, and comparing your hospital to other average hospitals will not necessarily result in high or improved performance.

### **Beneficiary**

A person who is entitled to services.

### **Benefits**

Specific services members or policyholders are entitled to use in their health plan.

### **Best practices**

Strategies and programs that have demonstrated superior performance in their clinical, operational (management), and/or governance processes and outcomes. Also referred to as "recommended practices."

### **Board certified**

Describes a physician who is certified as a specialist in his or her area of practice; a physician who has met specific standards of knowledge and clinical skills within a specific field or specialty.

### **Bundled payment**

Also known as "case rates" or "episode-based payment," this payment model makes a single payment for all services related to a treatment or condition, possibly spanning multiple providers in multiple settings.

### **Bundled Payments for Care Improvement (BPCI) Initiative**

A payment model where organizations enter into payment arrangements that include financial and performance accountability for episodes of care. These models

may lead to higher quality, more coordinated care at a lower cost to Medicare. Research has shown that bundled payments can align incentives for providers allowing them to work closely together across all specialties and settings.

### **Bylaws**

Rules adopted by an organization chiefly for the government of its members and the regulation of its affairs.

### **Capital expenditure**

An expenditure that benefits more than one fiscal accounting period; a cost to acquire a long-term asset.

### **Capital structure (leverage)**

Measures the extent to which debt financing is employed by a corporation; the mix of long-term debt and equity employed by a corporation for permanent, long-term financing needs.

### **Capitation**

A method of payment for health services in which a provider is paid a fixed amount for each member/subscriber regardless of services provided to each patient.

### **Caps**

Upper limits on fees; the maximum amount of money that can be charged or will be paid.

### **Cardiac Rehabilitation (CR) Incentive Payment Model**

A model created by the Department of Health & Human Services (HHS) that will test the effects of payments that encourage the use of cardiac rehabilitation services. The payment model will examine the impact of providing an incentive payment for beneficiaries utilizing rehabilitation services in the 90-day care period following hospital discharge after being hospitalized for a heart attack or bypass surgery. The model is founded on the idea that increasing the use of cardiac rehabilitation services has the potential to improve patient outcomes and help keep patients healthy and out of the hospital.

### **Care continuum**

In medicine, describes the delivery of healthcare over a period of time. In patients with a disease, this covers all phases of illness from diagnosis to cure, or depending on the illness, the end of life.

### **Carve-out benefits**

High-cost or specialty services, such as mental health, substance abuse, vision, or dental, which are financed and managed separately from other covered health services. Also may refer to a population sub-group for whom separate healthcare arrangements are made.

**Case management**

A managed care technique in which a patient with a serious medical condition is assigned an individual who coordinates, manages, and monitors the patient's continuous, cost-effective treatment, sometimes outside a hospital setting.

**Catastrophic processes**

Processes in patient care that, if failed, cause direct fatal or almost fatal harm to the patient. For example, if a patient receives the wrong type of blood, that patient can be severely injured or can die within hours. (See also *non-catastrophic process*.)

**Center for Consumer Information and Insurance Oversight (CCIIO)**

A center created by CMS that helps implement many reforms of the Affordable Care Act. It is tasked with setting and enforcing standards for health insurance that promote fair and reasonable practices to ensure that affordable, quality health coverage is available to all Americans. The center also provides consumers with comprehensive information on coverage options currently available so they may make informed choices on the best health insurance for their family.

**Center for Medicare and Medicaid Innovation**

An office within the Centers for Medicare and Medicaid Services (CMS) that was created by the Affordable Care Act to research and test innovative payment and service delivery models in order to reduce the cost and improve the quality of care for patients.

**Center of Excellence (COE)**

A specialized product line, such as cardiac services, developed by a provider in order to establish a recognized high-quality, high-volume, cost-effective clinical program.

**Certificate of Authority (COA)**

License issued by a state government to operate a health maintenance organization (HMO) within that state.

**Certificate of Coverage**

The legal description given to employees or beneficiaries about the benefits, providers, and general rules and regulations of a health plan.

**Certificate of Need (CON)**

Laws of certain states that require entities to seek prior approval from the state before expanding and/or offering new types of healthcare services.

**Chief of Staff (COS)**

The physician/doctor elected by the medical staff to represent it in a variety of settings including the organization's board meetings. It is not unusual for the Chief of Staff to be an *ex officio* member of the board (with or without vote as determined by the specific organization's bylaws). The COS is also the primary contact between the medical staff, management, and the board, and is responsible for seeing that

any initiatives or responsibilities placed on the medical staff by the board are carried out.

**Children’s Health Insurance Program (CHIP)**

See *State Children’s Health Insurance Program*.

**Churning**

An unethical practice in a fee-for-service reimbursement environment in which providers see patients more often than is medically necessary in order to increase revenue.

**Civil Monetary Penalty Law (CMP)**

Under this law, the Office of Inspector General (OIG) may bring administrative actions against providers who submit false or fraudulent claims to the United States or its agent for a medical item or service. Penalties for violation may include fines and/or termination from Medicare, Medicaid, or other state healthcare programs.

**Clinical integration**

An active and ongoing program to evaluate and modify the clinical practice patterns of the physician participants so as to create a high degree of interdependence and collaboration among the physicians to control costs and ensure quality.

**Clinical protocols or clinical practice guidelines (CPG)**

A healthcare management tool that provides evidence-based recommendations for the diagnosis and/or treatment of specific conditions. These recommendations are often developed by professional associations or other groups representing providers in a certain specialty, and they may be endorsed by government agencies, accrediting bodies, and other organizations. (See also *evidence-based medicine*.)

**Clinical quality measure (CQM)**

Created by CMS, clinical quality measures help measure and track the quality of healthcare services provided by hospitals and providers. CQMs measure various aspects of patient care including: health outcomes, clinical processes, patient safety, efficient use of resources, care coordination, patient engagement, population and public health, and clinical guidelines. Providers are required to report CQMs to CMS as part of quality improvement and reimbursement programs.

**Clinically Integrated Network (CIN)**

A group of providers (physicians, hospitals, pharmacists, social workers, post-acute providers, etc.) that contract together to improve the quality and efficiency of care. Participants share clinical and financial information and work as a team to improve care coordination, utilize healthcare resources wisely, and develop policies and procedures to improve care delivery.

**Coinsurance**

The share of healthcare premiums that is paid by the insured.

**Community health needs assessment**

A comprehensive profile of community health that encompasses the demographics of the community, special healthcare needs and targeted populations within the community, barriers to projected future needs, and other factors.

**Community hospital**

Non-federal, typically not-for-profit acute care general and specialty hospital that provide facilities and services to the general public.

**Comparative effectiveness research (CER)**

A field of research that analyzes and compares the harms and benefits of existing healthcare interventions and strategies for preventing, diagnosing, treating, and monitoring the health conditions of a specific group of patients in order to determine the best treatment methods.

**Compliance plan**

A program set up by a healthcare provider to ensure compliance with regulations, including regarding coding and billing, to prevent fraud and abuse.

**Comprehensive Care for Joint Replacement (CJR) Model**

A model created by CMS aimed to support better and more efficient care for beneficiaries undergoing hip and knee replacements from surgery through recovery. This model tests bundled payment and quality measurement for an episode of care associated with hip and knee replacements to encourage hospitals, physicians, and post-acute care providers to work together to improve the quality and coordination of care.

**Comprehensive ESRD Care (CEC) Model**

A model the Center for Medicare & Medicaid Innovation designed to identify, test, and evaluate new ways to improve care for Medicare beneficiaries with End-Stage Renal Disease (ESRD). The model builds on experience from the Pioneer ACO Model, Next Generation ACO Model, and the Medicare Shared Savings Program to test accountable care organizations for ESRD beneficiaries. (Also see *accountable care organization*.)

**Computerized physician/provider order entry (CPOE)**

An electronic system that healthcare professionals can use to enter drug and test orders. These systems have access to a patient's medical information and have built-in safeguards that screen for potential medical errors, including dosing mistakes, drug interactions, and allergic reactions. While initially expensive, CPOE has been shown to improve quality and lower operating costs by significantly reducing medical error rates.

**Conditions of Participation**

Developed by CMS, Conditions of Participation (CoPs) and Conditions for Coverage (CFCs) are the minimum health and safety standards that healthcare providers and

suppliers must meet in order to be Medicare and Medicaid certified. These standards are the foundation for improving quality and protecting the health and safety of beneficiaries. CMS also ensures that the standards of accrediting organizations recognized by CMS meet or exceed the Medicare standards set forth in the CoPs/CfCs.

### **Conflict of interest (COI)**

A situation in which someone in a position of trust, such as a lawyer, insurance adjuster, a politician, executive or director of a corporation/non-profit organization, or a medical research scientist or physician, has competing professional or personal interests that may impair his/her ability to fulfill duties to the corporation or organization impartially. A conflict of interest can exist even if no unethical or improper act results from it.

The non-profit board's obligations with respect to conflict of interest arise within the context of the fiduciary duty of loyalty, which legally obligates a director to exercise his/her powers in good faith and in the best interests of the organization, as opposed to his/her own interests or the interests of another entity.

### **Consolidated Omnibus Budget Reconciliation Act (COBRA)**

A law that gives individuals and their families the right to choose to continue group coverage for up to 18 months under certain circumstances (e.g., loss of job, reduction in number of hours worked). Individuals choosing this option are typically required to pay the full costs of coverage.

### **Consumer Assessment of Healthcare Providers and Systems (CAHPS®)**

A public-private initiative (with CMS and AHRQ) to develop standardized surveys of patients' experiences with ambulatory and facility-level care. The program develops and supports the use of a comprehensive and evolving family of standardized surveys that ask consumers and patients to report on and evaluate their experiences with healthcare. CAHPS originally stood for the Consumer Assessment of Health Plans Study, but as the products have evolved beyond health plans, the name has evolved as well to capture the full range of survey products and tools. (See also *Hospital Consumer Assessment of Healthcare Providers and Systems, or HCAHPS®*.)

### **Consumer-directed/driven healthcare**

A term describing a broad movement to give consumers more control over—and accountability for—healthcare decisions, including lifestyle choices, health coverage, provider choice, and use of services. Purchasers moving toward consumer-directed healthcare often give employees/beneficiaries a greater financial stake in healthcare decisions and provide them with information on the relative costs and quality of providers or plans to help guide these decisions.

### **Consumer Operated and Oriented Plan (CO-OP)**

A program created by the Affordable Care Act that allows for the development of qualified non-profit health plans selling essential health benefit plans through state exchanges.

**Continuous quality improvement (CQI)**

A continuing process of and systematic approach to identifying problems in health-care delivery, and testing and monitoring methods and solutions for constant improvement; scientific methods are often employed to improve work processes, eliminate wastes, etc., in order to meet and exceed consumer needs and expectations (also called total quality management, or TQM).

**Coordination of benefits (COB)**

Agreement between health plans and insurers to make certain that the same services are not paid for more than once.

**Copayment**

The money patients pay for their share of a specific healthcare service in addition to what insurance covers.

**Cost-benefit analysis**

A method of comparing the monetary costs of a project to the benefits.

**Cost center**

A business or organizational unit of activity that incurs expenses.

**Cost coverage ratio (CCR)**

The standard for evaluating the appropriate rate and thus the success of a managed care contracting effort. The cost coverage ratio is calculated by dividing the net revenue from a specific health plan by the fully allocated expenses associated with delivering that care to that plan's patients.

**Cost-effectiveness analysis**

A method of measuring and comparing benefits and total costs (direct, indirect, and intangible) of a project or program to the benefits and total costs of another project or program.

**Cost-shifting**

The practice of increasing reimbursement from one payer source to subsidize inadequately reimbursed services rendered to other payers' patients.

**Credentialing**

The review process of evaluating a healthcare provider to determine whether the provider meets certain standards of knowledge and clinical skill, including a review of licensure, board certification, malpractice insurance and history, and the like.

**Critical access hospital (CAH)**

A designation by Medicare that is reserved for hospitals meeting certain criteria related to access to services. CAHs are typically small, inpatient facilities that represent the only source of inpatient and/or emergency care in a defined geographic

(often rural) area. CAHs are subject to additional regulations from Medicare. Often designated as sole community hospitals (SCHs; see separate entry), they are also typically eligible for upward adjustments in payments from Medicare.

### **Critical pathway**

A healthcare management tool that suggests the best way (based upon scientific evidence) to treat a disease or use a healthcare procedure; designed to reduce variations in clinical practices, these tools typically map out day-by-day recommendations to guide a routine patient's hospital stay.

### **Current assets**

Assets that are expected to be turned into cash within one year (e.g., accounts receivable).

### **Current liabilities**

Obligations that will become due and payable with cash within one year.

### **Current ratio**

A financial ratio designed to measure the relationship or balance between current assets and current liabilities; an important liquidity ratio.

### **Customer-centered care/patient-centered care**

Care that puts the customer first—their cultural traditions, personal preferences and values, family situations, and lifestyles. Customer-centered hospitals and health systems look to their customers and their families for feedback and engage customers at every level of care design and implementation. It puts responsibility for important aspects of self-care and monitoring in patients' hands—along with the education and support they need to carry out that responsibility. It ensures that transitions between providers, departments, and healthcare settings are respectful, coordinated, and efficient. Customer-centered care is also one of the overarching goals of health advocacy, in addition to safer medical systems, and greater patient involvement in healthcare delivery and design.

### **The Dartmouth Atlas of Health Care**

Based at the Dartmouth Institute for Health Policy and Clinical Practice and supported by a coalition of funders led by the Robert Wood Johnson Foundation, the Dartmouth Atlas documents variations in how medical resources are distributed and used within the U.S. It uses Medicare data to provide information and analysis about national, regional, and local markets, as well as hospitals and physicians.

### **Dashboard**

A report that displays the state of the hospital at a glance, using standard visual symbols much like a car's dashboard. In essence, the dashboard shows key indicators related to various aspects of the hospital, including financial, quality, and patient satisfaction measures. Most hospitals use more than one dashboard, showing

differing levels of detail for the board and management team. They are also referred to as “executive dashboards” or “charts of key performance indicators.”

### **Deductible**

The level of out-of-pocket expenditures that a policyholder is responsible for paying each year before insurance coverage begins. Deductibles can range from just a few hundred dollars to \$5,000 or more. Insurance plans with low deductibles tend to be more expensive. High-deductible plans can be combined with a health savings account or HSA (see separate entry).

### **Deficit Reduction Act of 2005 (DRA)**

Legislation that saves nearly \$40 billion over five years from mandatory spending programs through slowing the growth in spending for Medicare and Medicaid, changing student loan formulas, and other measures. For Medicare, it requires a payment adjustment in Medicare diagnosis related group (DRG) payment for certain hospital-acquired conditions (applies to IPPS hospitals only). CMS has titled the program, “Hospital-Acquired Conditions and Present on Admission Indicator Reporting.” Starting in 2007, hospitals were required to submit data on specified quality measures or have their annual market basket update reduced by two percentage points.

Section 5001(c) of the DRA required the Secretary to identify, by October 1, 2007, at least two conditions that for discharges occurring on or after October 1, 2008, IPPS hospitals will not receive additional payment for cases when one of the selected conditions is acquired during hospitalization (i.e., was not present on admission). The case would be paid as though the secondary diagnosis were not present. Section 5001(c) provides that CMS can revise the list of conditions from time to time, as long as it contains at least two conditions.

### **Defined contribution plan**

The term “defined contribution” (DC) is used to describe a wide variety of approaches to the provision of health benefits, all of which have in common a shift in responsibility for payment and selection of healthcare services from employers to employees. DC-type benefits have existed as cafeteria plans since the 1980s. A cafeteria plan gives each employee the opportunity to determine the allocation of his or her total compensation (within employer-defined limits) among various employee benefits (primarily retirement and health).

### **Derivative**

A financial instrument whose values depend on the value of other underlying financial instruments. The main types of derivatives are futures, forwards, options, and swaps.

The main use of derivatives is to reduce risk for one party. The diverse range of potential underlying assets and pay-off alternatives leads to a wide range of derivatives contracts available to be traded in the market. Derivatives can be based on different

types of assets such as commodities, equities (stocks), residential mortgages, commercial real estate loans, bonds, interest rates, exchange rates, or indexes (such as a stock market index, consumer price index, or other derivatives). Their performance can determine both the amount and the timing of the pay-offs. Unregulated credit derivatives have become an increasingly large part of the derivative market.

### **Diagnosis related group (DRG)**

See *Medicare severity-diagnosis related group (MS-DRG)*.

### **Direct graduate medical education (DGME) payments**

The payments hospitals receive from Medicare/Medicaid based on the amount of medical school graduates being trained.

### **Disabling Guidelines**

Guidelines stipulating the situations in which a director is no longer fit to serve on the board. These usually include conflicts that are so significant that an individual should not be elected to the board, or should be asked to resign if they occur during a director's term (e.g., repeated, intentional failure to disclose a conflict of interest; a single but significant, intentional failure to disclose a conflict of interest; intentional violation of the organization's confidentiality policy or code of conduct, etc.).

### **Disclosure of financial relationships report (DFRR)**

A report designed to collect information concerning the ownership and investment interests and compensation arrangements between hospitals and physicians. CMS proposed to send the DFRR to 500 hospitals to provide sufficient information to determine compliance and to assist in any future rulemaking concerning the reporting requirements and other physician self-referral provisions.

In 2010, CMS delayed implementation of the DFRR and instead focused on the implementation of section 6001 of the Affordable Care Act, which includes disclosure requirements relevant to physician-owned hospitals for purposes of complying with the rural provider and whole-hospital ownership exceptions. The information submitted by hospitals on CMS' Web site is published and updated yearly.

### **Discounted fee-for-service**

A discounted payment method based upon a negotiated amount or percentage that is agreed upon between a provider and a health plan.

### **Disproportionate share hospital (DSH) payments**

A Medicare payment system that provides additional Part A payments to hospitals that treat a relatively high proportion of low-income persons (as compared to other hospitals).

### **DNA sequencing**

The relative ordering of base pairs in DNA, a gene, a chromosome, or an entire genome.

## **Dodd-Frank Wall Street Reform and Consumer Protection Act**

A federal statute signed into law by President Barack Obama on July 21, 2010. Passed as a response to the 2008–2010 recession, it is the most sweeping change to financial regulation in the U.S. since the Great Depression, and affects almost every aspect of the financial services industry.

While Dodd-Frank specifically targets for-profit corporations, many of the provisions have potential future impact on non-profit governance, including hospitals and health systems: risk management, executive compensation, stakeholders' rights, and board qualifications to govern.

### **Duty of care**

The obligation of directors to exercise proper diligence of care in their decision-making process, meaning the directors acted in “good faith,” with a level of care that an ordinarily prudent person would exercise in like circumstances, and in a manner that they reasonably believe is in the best interest of the organization.

### **Duty of loyalty**

Requires directors to discharge their duties unselfishly, in a manner designed to benefit only the organization and not the directors personally. It is the duty most focused upon by regulators because it is a duty affected by self-dealing, related party transactions, and other arrangements that may result in improper personal benefits to individuals. It incorporates a duty to disclose situations that may present a potential for conflict with the organization's mission, as well as a duty to avoid competition with and appropriation of the assets of the organization.

### **Duty of obedience**

Requires that directors be faithful to the underlying charitable purposes and goals of the non-profit organization they serve, as set forth in the organization's governing documents. It presumes that the mission of the organization, and the means to achieve it, are inseparable.

### **Early and periodic screening, diagnosis, and treatment (EPSDT)**

A federal requirement that state Medicaid programs cover a comprehensive set of preventive services and early assessment of the health needs of Medicaid-eligible children. Any medically necessary treatment that results from the provision of EPSDT-mandated services must also be covered, even if that service is not typically covered by the Medicaid program.

### **Economic credentialing**

A term that refers to a hospital's use of economic factors (e.g., costs, utilization) in addition to quality-related criteria in determining whether to grant or extend privileges to a physician to practice in the hospital. (See also *credentialing*.)

### **Economies of scale**

Rewards of efficiency and cost savings that are the outcome of mass production.

### **Emergency Medical Treatment and Labor Act (EMTALA)**

Known as the patient anti-dumping statute, this federal law imposes specific obligations on Medicare-participating hospitals and critical access hospitals that offer emergency services. It sets forth requirements for medical screening exams for medical conditions, stabilizing treatment, and appropriate transfer, and prohibits delays in services to inquire about a patient's payment method or insurance status. It specifically addresses the hospital's obligations with respect to specialty physician availability in the ED.

CMS adopted changes to EMTALA regulations in its final 2009 IPPS rule, effective October 1, 2008, including: 1) the withdrawal of a proposed rule applying EMTALA requirements to hospital inpatients, 2) deletion of language requiring that an on-call list must be maintained "in a manner that best meets the needs of hospital patients," and 3) adoption of the proposed rule that would permit hospitals to meet the EMTALA requirement for maintaining an on-call physician list by participating in a formalized community call plan among hospitals. For more information on call plan requirements and other EMTALA changes, visit [www.cms.hhs.gov](http://www.cms.hhs.gov).

### **Emergency operations center (EOC)**

During a disaster response, a central emergency operations center coordinates emergency information and resources.

### **Employer pay-or-play**

A mandate of the Affordable Care Act, as of January 1, 2015, requires employers with more than 50 employees to offer and pay for health benefits for their full-time workers or pay a \$2,000 per employee tax penalty if they do not offer health insurance (as amended by the reconciliation bill).

### **Encounter**

The recording of a medically related service or visit rendered by a provider to a health plan enrollee.

### **Enterprise risk management (ERM)**

The methods and processes used by organizations to manage risks and seize opportunities related to the achievement of their objectives. ERM provides a framework for risk management, which typically involves identifying particular events or circumstances relevant to the organization's objectives (risks and opportunities), assessing them in terms of likelihood and magnitude of impact, determining a response strategy, and monitoring progress. By identifying and proactively addressing risks and opportunities, corporations can protect and create value for their stakeholders, including owners, employees, customers, regulators, and society overall.

### **Episode of care**

All services provided to a patient for a specific medical problem or condition during a set time period.

**Equity joint venture**

A joint venture between a hospital and a group of physicians in which a separate legal structure is created that is for-profit (i.e., not required to comply with tax rules that apply to tax-exempt organizations). It normally takes the form of a limited liability corporation (LLC), or similar entity, such as a limited liability partnership, general partnership, or limited partnership. Both the sponsoring hospital/health system and the physician investors are “members” of the LLC. The capital structure of the LLC consists of equity contributed by the hospital/health system and physician investors, and debt.

**Essential health benefits**

A set of healthcare service categories that must be covered by certain health plans. The Affordable Care Act ensures health plans offered in the individual and small group markets offer a comprehensive package of items and services, known as essential health benefits. Essential health benefits must include items and services within at least the following 10 categories: ambulatory patient services; emergency services; hospitalization; pregnancy, maternity, and newborn care; mental health and substance use disorder services, including behavioral health treatment; prescription drugs; rehabilitative and habilitative services and devices; laboratory services; preventive and wellness services and chronic disease management; and pediatric services.

**Ethical, Legal, and Social Implications Program (ELSI)**

A component of the Human Genome Project; currently studies the ethical, legal, and social issues surrounding the availability of genetic information. The world’s largest bioethics program, it researches the implications of the use of genetic information on privacy and confidentiality, psychological impact and stigmatization, reproductive issues, clinical issues, conceptual and philosophical issues, health and environmental issues, and commercialization of products.

**Evidence-based hospital referral (EHR)**

The practice of referring patients to hospitals that have a proven track record in producing high-quality outcomes in a given procedure or diagnosis. When outcomes data are missing (as is often the case), EHR involves referring patients to high-volume centers for those select procedures and diagnoses (e.g., CABG surgery) where there is a proven correlation between high volume and high quality.

**Evidence-based medicine (EBM)**

A term that refers to that portion of the practice of medicine that is based upon established scientific findings as derived from clinical research studies. Most clinical guidelines, protocols, and care paths are based upon this type of evidence.

**Evidence of coverage (EOC)**

A certificate, agreement, contract, or letter of entitlement issued to a subscriber or enrollee establishing coverage to which the subscriber or enrollee is entitled.

**Exclusive provider organization (EPO)**

A type of managed care plan in which a member must remain within the provider network to receive benefits.

**Experience rating**

An insurance method of setting premium rates based on the actual healthcare costs of a group or groups.

**Explanation of benefits (EOB)**

A statement to a member or covered insured explaining how and why a claim was or was not paid.

**False Claims Act (FCA)**

The criminal False Claims Act makes it illegal to present a claim upon or against the United States that the claimant knows to be false, fictitious, or fraudulent. The civil False Claims Act provides that any person who knowingly presents or causes to be presented to the U.S. government a false or fraudulent claim for payment or approval; knowingly makes, uses, or causes to be made or used, a false record or statement to get a false or fraudulent claim paid or approved by the government; or conspires to defraud the government by getting a false or fraudulent claim allowed or paid violates the act. The act also has *qui tam* provisions (see *qui tam action*). Under the civil provisions of the FCA, a defendant can be assessed a penalty of at least \$5,000 and as much as \$10,000 per claim, plus three times the damages incurred by the federal government in its prosecution and investigation of the case. The criminal provisions provide for a fine of \$25,000 and up to five years imprisonment upon conviction. The False Claims Act dates back to the Civil War era when suppliers of the Union Army were selling defective goods to the federal government. The statute has been dusted off in recent years by federal prosecutors to recapture billions of dollars allegedly billed improperly to the government.

**Federal Emergency Management Agency (FEMA)**

Agency of the U.S. government tasked with disaster mitigation, preparedness, response, and recovery planning. FEMA also initiates proactive mitigation activities, trains first responders, and manages the National Flood Insurance Program. In 2003, it became part of the U.S. Department of Homeland Security.

**Federal Employee Health Benefits Plan (FEHBP)**

The program that covers the nation's nine million active federal employees, retirees, and dependents. Those covered under this plan typically have a broad choice of health plans, with the federal government paying a largely fixed amount of money towards coverage. Thus, FEHBP enrollees who choose higher-priced plans bear much of the incremental financial costs of these plans.

**Federal Insurance Contribution Act (FICA)**

A United States payroll tax that requires employees and employers to pay into Social Security and Medicare.

**Federal medical assistance percentage (FMAP)**

The federal government's share of a state's expenditures for certain medical and social service programs, such as Medicaid and the Children's Health Insurance Program.

**Federal poverty level (FPL)**

Income criteria determined by the U.S. Department of Health and Human Services that determines if a person is eligible for assistance through various federal programs.

**Fee-for-service (FFS)**

A traditional method of reimbursement to healthcare providers in which an insurance company pays hospitals and doctors according to the fees on a preset schedule.

**Fiduciary**

Of, relating to, or involving a confidence or trust. In healthcare, a director's fiduciary duty incorporates the three duties of care, obedience, and loyalty (see separate entries for those definitions). The fiduciary duty relates to all of a director's responsibilities to the organization's welfare, not just financial oversight.

**Fixed costs**

Costs that do not vary with the output or activity of an organization; the "cost of opening the doors" (e.g., rent, utilities).

**Form 990**

The IRS form that tax-exempt organizations are required to file in lieu of a tax return. Completed forms are available to the public and therefore can affect public perception of an organization. Schedule H of the Form 990 specifically refers to hospitals, and according to the IRS, "Schedule H must be completed by an organization that operates at least one facility that is, or is required to be, licensed, registered, or similarly recognized by a state as a hospital." Schedule H covers charity care and community benefit; joint ventures; and Medicare, bad debt, and other items. Organizations not required to file Form 990 might wish to use it for state reporting purposes.

In December 2007, the IRS released a revised version of Form 990 that clarifies metrics, moves the explanation of the organization's "program service accomplishments" much closer to the beginning of the form, clarifies and streamlines many of the compensation items that must be reported, streamlines portions of Schedule H, delays full Schedule H reporting by one year, and includes expanded governance guidelines. This revised Form 990 is to be filed for the 2008 tax year and going forward and the full Schedule H is required for the 2009 tax year and going forward.

For more information and to download a copy of the revised Form 990, visit [www.irs.gov](http://www.irs.gov).

**Formulary**

The list of prescription medications that may be dispensed by participating pharmacies.

**Foundation model**

A hospital or healthcare system that acquires the assets of a medical group, manages all non-physician staff and facilities, and contracts with the medical group for professional services.

**FTEs per adjusted admission**

The number of full-time equivalent (FTE) staff divided by the number of adjusted admissions.

**Full-time equivalent (FTE)**

Refers to the number of annual paid hours for one full-time employee; used as shorthand for “a full-time employee.”

**Gainsharing**

The sharing between hospitals and physicians of cost savings that stem from specific actions to improve the efficiency of care delivery. The Department of Health and Human Services (HHS) Office of Inspector General (OIG) issued a ruling in 1999 that effectively banned gainsharing arrangements, concluding that the Civil Money Penalties Law prohibited gainsharing, and that the OIG lacked the statutory authority to impose safeguards to ensure that cost-saving measures do not reduce quality. In March 2005, MedPAC urged that Congress provide HHS with the authority to allow a much broader use of hospital–physician gainsharing arrangements, as long as they are regulated to protect the quality of care and minimize financial incentives that could affect physician referrals.

The OIG “reluctantly” approved two gainsharing arrangements in January 2008. Both are cardiac related and structured by the same consultant. “OIG is not in a position to approve or support the concept of gainsharing more generally because gainsharing arrangements on their face violate the civil monetary penalty provision of the Social Security Act.” OIG has listed eight specific safeguards.

Consult your attorney or legal counsel before entering into any gainsharing arrangement.

**Gatekeeper**

A healthcare professional who controls a patient’s access to healthcare and coordinates, manages, and authorizes all healthcare services provided to a patient; common model of managed care plans.

**Gene therapy**

The injection of healthy genes into a patient to cure or treat a hereditary disease or illness.

**Genetic testing**

The process of testing a certain population of people for the purpose of detecting genetic susceptibility or predisposition to or determination of a condition or disease.

**Genetics**

The study of the patterns of inheritance of specific traits.

**Genomics**

The study of all the genetic material within the chromosomes of a particular organism.

**Global payments**

See *capitation*.

**Government Accountability Office (GAO)**

An independent, nonpartisan agency that investigates how the federal government spends taxpayer dollars. GAO gathers information to help Congress determine how well executive branch agencies are doing their jobs. GAO's work routinely answers such basic questions as whether government programs are meeting their objectives or providing good service to the public. Ultimately, GAO ensures that government is accountable to the American people. (Previously known as the General Accounting Office, the name was changed in 2004 to better reflect its activities.)

**Grandfathered health plan**

A health benefit plan or health insurance policy that was created on or before March 23, 2012—the date of enactment for the Affordable Care Act. Grandfathered plans are exempted from many changes required under the ACA. Plans or policies may lose their “grandfathered” status if they make certain significant changes that reduce benefits or increase costs to consumers.

**Group model**

A type of HMO that contracts with physician groups for healthcare services for its health maintenance organization (HMO) enrollees at a negotiated fixed or capitated rate; in exchange, the HMO usually provides the facility, staff, and administrative support for the physician group.

**Group practice**

Three or more physicians formally organized to deliver patient care, make common use of facilities, equipment, and staff, and share income by a prearranged formula; can have a single-specialty or multi-specialty focus.

**Group Practice Without Walls (GPWW)**

A group practice in which the provider members come together legally but continue to practice autonomously in private offices scattered throughout the service area.

**Health Alliance**

A conglomerate of business and consumers formed to negotiate prices for health benefits with HMOs or networks of physicians, hospitals, insurers, and other health-care providers.

**Health Care and Education Reconciliation Act of 2010 (HCERA)**

This legislation, signed into effect on March 30, 2010, combines revised portions of the Affordable Care Act with the Student Aid and Fiscal Responsibility Act (SAFRA), which amends the Higher Education Act of 1965 (HEA).

**Health Care Fraud and Abuse Control (HCFA)**

A program established by the Health Insurance Portability and Accountability Act of 1996 that funds efforts to coordinate federal, state, and local law enforcement efforts to prevent healthcare fraud and abuse.

**Health Care Quality Improvement Act (HCQIA)**

Passed by Congress in 1986, this legislation provides healthcare organizations and their peer review bodies immunity from monetary damages as a result of “adverse professional review actions” that relate to the competence or professional conduct of an affected physician or dentist. The act has established standards for due process when restricting or terminating a physician’s privileges. It does not prevent other types of legal action (e.g. injunctions or restraining orders) and it does not convey protection of peer review documents from discovery in legal proceedings. HCQIA also created the National Practitioner Data Bank (NPDB), a system for reporting physicians whose competency has been judged inadequate.

Most medical staff “fair hearing plans” are written to comply with the due process requirements of HCQIA. HCQIA immunity applies to every jurisdiction in the United States.

**Health information network**

See *regional health information organization*.

**Health Information Technology for Economic and Clinical Health Act (HITECH)**

Legislation signed into law on February 12, 2009 as part of the American Recovery and Reinvestment Act of 2009. HITECH was meant to promote the adoption of electronic health records and supporting technology in the United States.

**Health Insurance Marketplace**

Set up in accordance with the Affordable Care Act, the Health Insurance Marketplace is a resource where individuals, families, and small businesses can learn about their health coverage options; compare health insurance plans based on costs, benefits, and other important features; choose a plan; and enroll in coverage. The marketplace also provides information on programs that help people with low to moderate income and resources pay for coverage.

**Health Insurance Portability and Accountability Act of 1996 (HIPAA)**

Federal law that addresses: 1) health coverage for workers and their families when they change or lose jobs; 2) reduction in fraud and abuse by giving government more flexibility in pursuing organizations suspected of fraud; and 3) administrative simplification, to standardize the electronic environment for the most common health-care back-office functions; it includes security and privacy standards.

**Health maintenance organization (HMO)**

An organization that provides and organizes a wide array of comprehensive health-care services for its members within three constraints: 1) the use of a primary care provider to coordinate patient care; 2) the use of specific providers and facilities; and 3) a fixed-fee structure.

**Health savings account (HSA)**

Formerly known as medical savings accounts (MSAs) or Archer MSAs, these accounts are available to individuals with high-deductible health insurance plans (and to companies that offer their employees such plans). Under an HSA, individuals (or companies on behalf of their employees) can set aside tax-free savings to cover out-of-pocket health-related expenditures, including expenses sometimes not covered by insurance, such as dental and eye care.

**Health system**

A corporate body that owns and/or manages hospitals and other health-related subsidiaries.

**Healthcare Effectiveness Data and Information Set (HEDIS)**

A standard set of performance measures developed in 1991 to measure the quality and performance of health plans by focusing on four aspects of healthcare: quality, access and patient satisfaction, membership and utilization, and finance; HEDIS is sponsored and coordinated by the National Committee for Quality Assurance (NCQA), and has been updated several times since its inception.

**Healthcare Facilities Accreditation Program (HFAP)**

Founded by the American Osteopathic Association in 1945, HFAP has deemed authority from CMS to conduct accreditation surveys of acute care hospitals under the Medicare Conditions of Participation. The program is a recognized alternative to accreditation by CMS or The Joint Commission.

**Healthy People 2020**

A set of formal goals and objectives for the nation's health status established by the federal government. It is updated every decade.

**High-risk pool**

State programs that provide coverage to individuals who are considered uninsurable, usually due to a pre-existing condition, and are unable to purchase private insurance. The Affordable Care Act called for the establishment of a temporary

high-risk pool in every state. These pools, which existed alongside state high-risk pools already in operation, went into effect June 21, 2010, and ended on January 1, 2014, when coverage became available to high-risk individuals through state health insurance exchanges.

### **Home healthcare**

Any of a variety of services (e.g., nursing, physical therapy, social services) provided in an individual's home.

### **Horizontal integration**

A comparative strategy used by some hospitals or other organizations to control the geographical area of healthcare services by integrating the services of two or more similar (horizontal) healthcare facilities.

### **Hospice care**

Programs providing palliative care, including pain relief, and supportive services that address the emotional, social, financial, and legal needs of terminally ill patients and their families. Hospice care can be provided in a hospice facility, hospital, home, or other setting.

### **Hospital Care Intensity Index (HCI)**

A measurement used by the Dartmouth Atlas of Health Care that reflects both the amount of time spent in the hospital and the intensity of physician services delivered in the hospital. Data is presented by state and individual hospital, for the purpose of determining the propensity of states, regions, and hospitals to rely on the acute care hospital in managing chronic illness.

### **Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS® or Hospital CAHPS®)**

A nationally standardized survey developed by CMS and AHRQ that asks consumers and patients to report on and evaluate their experiences with care provided in hospitals. Questions include the communication skills of providers and the accessibility of services.

The Affordable Care Act includes HCAHPS among the measures to be used to calculate value-based incentive payments in the hospital value-based purchasing program, which began with discharges in October 2012. (See also *Consumer Assessment of Healthcare Providers and Systems, or CAHPS®*.)

### **Hospital Inpatient Quality Reporting Program (also known as IQR)**

This program was originally mandated by Section 501(b) of the Medicare Prescription Drug, Improvement, and Modernization Act (MMA) of 2003, which authorized CMS to pay hospitals that successfully report designated quality measures a higher annual update to their payment rates.

The Hospital IQR program is intended to equip consumers with quality of care information to make more informed decisions about healthcare options. It is also intended to encourage hospitals and clinicians to improve the quality of inpatient care provided to all patients. Eligible hospitals that do not participate in the IQR program will receive an annual market basket update with a 2.0 percentage point reduction. The hospital quality of care measures and additional information are available on the CMS Hospital Compare Web site, [www.medicare.gov/hospitalcompare](http://www.medicare.gov/hospitalcompare).

### **Hospital Quality Alliance/Hospital Compare Web Site**

The Hospital Quality Alliance: Improving Care Through Information is a public/private collaboration to improve quality of care provided by the nation's hospitals by measuring and publicly reporting on that care. It was created through the efforts of the Centers for Medicare and Medicaid Services (CMS) and organizations that represent hospitals, doctors, employers, accrediting organizations, other federal agencies and the public.

The quality measures reported through this program relate to heart attack, heart failure, pneumonia, and surgical infection prevention. It also provides patient perspectives on care they received while in the hospital; and information on how many Medicare patients were admitted to the hospital for certain illnesses, and what Medicare pays for services associated with them. It allows consumers to compare hospitals based on the experiences of Medicare patients who participate in the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS<sup>®</sup>), in addition to data on process of care and outcome measures. Go to [www.hospitalcompare.hhs.gov](http://www.hospitalcompare.hhs.gov) for a complete list of measures.

### **Hospital standardized mortality rate (HSMR)**

Developed by Sir Brian Jarman at the Imperial College in the United Kingdom, the HSMR is based on diagnoses groups that account for 80 percent of all deaths in acute care hospitals and is adjusted for other factors affecting mortality (e.g., age, sex, and mix of diagnoses). Mortality rates are calculated for each hospital and stratified by variables of interest (e.g., age, sex, and length of stay) for each of the selected diagnosis groups. The HSMR is a ratio of observed to expected deaths multiplied by 100. A ratio equal to 100 suggests that there is no difference between the hospital's mortality rate and the average national rate, greater than 100 suggests that the hospital's mortality rate is higher than the average national rate, and less than 100 suggests that the hospital's mortality rate is lower than the average national rate.

### **Hospitalist**

Physicians who specialize in caring for patients in the hospital and generally only practice in acute care settings. Most are board-certified in internal medicine, family practice, or pediatrics; some have additional certification in specialties such as pulmonology, cardiology, or critical care medicine.

### **Human Genome Project (HGP)**

A national effort sponsored by the National Institutes of Health and the Department of Energy to create an ordered set of DNA segments and to develop new computational

methods for analyzing genetic map and DNA sequencing data. The project ended in 2003 with the completion of the human genetic sequence. An important feature of the project was the federal government's transfer of technology to the private sector through licensing technologies to private companies and awarding grants for innovative research. The project continues to catalyze the multibillion-dollar U.S. biotechnology industry and foster the development of new medical applications.

### **Incidence**

The number of new cases of a disease or condition in a defined population within a specific period of time.

### **Indemnity insurance**

Traditional type of insurance coverage whereby insured individuals are reimbursed for covered medical expenses after they have been incurred; payments are made to the insured or directly to the provider.

### **Independent Director**

An independent director has no direct or indirect, material conflict of interest with the corporation. An independent director has no conflicts or has a conflict of such insignificance (*de minimis*) that it would not be perceived to exert an influence on the director's judgment. What constitutes a *de minimis* and material conflict, respectively, must be defined precisely and in quantifiable terms.

### **Independent ethics committee (IEC)**

See *institutional review board*.

### **Independent Payment Advisory Board (IPAB)**

A 15-member board established in 2010 by the Affordable Care Act to offer recommendations to Congress on how to reduce Medicare costs. This board of presidential appointees would report on national and regional costs, utilization, and quality information of private payers' healthcare services, and use that information to prepare proposals to improve Medicare, starting in 2014, if growth per enrollee exceeded targets. As of 2016, funding for IPAB has been reduced and no members have been elected to the board.

### **Independent practice association (IPA)**

A group of independent physicians who have formed an association as a separate legal entity for contracting purposes; IPA physician providers retain their individual practices and see fee-for-service patients as well as those enrolled in HMOs.

### **Indirect medical education (IME) payments**

Additional payments by Medicare to teaching facilities to compensate them for the additional costs of educating residents and treating sicker patient populations.

**Individual mandate**

A requirement that all individuals purchase health insurance or pay a penalty. This is included in the Affordable Care Act.

**Institute for Healthcare Improvement (IHI)**

A not-for-profit organization focusing on the improvement of healthcare throughout the world. Founded in 1991 and based in Cambridge, Massachusetts, IHI was the force behind the 100,000 Lives and 5 Million Lives Campaigns. IHI's goal is to help accelerate change in healthcare by cultivating promising concepts for improving patient care and turning those ideas into action.

**Institute of Medicine (IOM)**

The Institute of Medicine serves as advisor to the nation to improve health. Established in 1970 under the charter of the National Academy of Sciences, the Institute of Medicine provides independent, objective, evidence-based advice to policymakers, health professionals, the private sector, and the public. Two groundbreaking reports from the IOM have spurred national movement in improving quality: *To Err is Human* (1999), and *Crossing the Quality Chasm* (2001).

**Institutional review board (IRB)**

An independent body constituted of medical/scientific professionals and non-medical/non-scientific members, whose responsibility it is to ensure the protection of the rights, safety, and well-being of human subjects involved in a trial and to provide public assurance of that protection by, among other things, reviewing and approving/providing favorable opinion on the trial protocol, the suitability of the investigator(s), facilities, and the methods and material to be used in obtaining and documenting informed consent of the trial subjects.

**Integrated delivery system (IDS)**

A regional healthcare network or system providing a large range of services (a continuum of care from acute care and outpatient ambulatory care to skilled nursing and long-term care) to a defined patient population within a certain geographical area.

**Intensivist**

Physicians specifically trained to care for critically ill patients in intensive care units (ICUs). Major purchasers are encouraging hospitals to staff their ICUs with such physicians.

**Intermediate sanctions**

A term used in regulations enacted by the IRS that is applied to non-profit organizations who engage in transactions that inure to the benefit of a disqualified person within the organization. These regulations allow the IRS to penalize the organization and the disqualified person receiving the benefit. Intermediate sanctions may be imposed either in addition to or instead of revocation of the exempt status of the organization. (See also *inurement*.)

## **International Classification of Diseases**

The international standard diagnostic classification for all epidemiological, clinical, and health management purposes. It is used to classify diseases and other health problems in relation to other factors, such as the symptoms, abnormal findings, social circumstances, and external causes, and it is used for many types of health and vital records. The International Classification of Diseases is published periodically by the World Health Organization and also provides national mortality and morbidity statistics.

## **International Organization for Standardization (ISO)**

ISO is a network of the national standards institutes of 157 countries. It is a non-governmental organization but it acts as a bridging organization in which a consensus can be reached on solutions that meet both the requirements of business and the broader needs of society, such as the needs of stakeholder groups like consumers and users. The ISO 9000 family of standards (9001–9004) is primarily concerned with quality management—specifically what organizations do to fulfill the customer's quality requirements and applicable regulatory requirements, while aiming to enhance customer satisfaction and achieve continual improvement of performance in pursuit of these objectives. Some healthcare organizations use ISO 9000 in lieu of accreditation by The Joint Commission.

## **Inurement/private inurement**

Rules of the Internal Revenue Service Code that prohibit any portion of the value of the tax-exempt organization from benefiting an individual. Inurement occurs when a tax-exempt organization compensates an individual at a level that is higher than a reasonable market level of compensation. In the case of a purchase or sale of a physician practice, inurement may occur if the physician sells his or her practice for more than fair market value or acquires or re-acquires a practice for less than fair market value. Hospitals that violate these rules risk losing their tax-exempt status.

## **The Joint Commission**

A national organization that evaluates and monitors the quality of care provided in hospitals, healthcare organizations, and agencies based on established standards. CMS grants deemed status for participation in Medicare when healthcare organizations are accredited by The Joint Commission. Formerly known as the Joint Commission on the Accreditation of Healthcare Organizations (JCAHO).

## **Joint venture**

The typical healthcare joint venture between a hospital and physicians consists of an outpatient facility that offers the technical component of healthcare services. Physicians credentialed to perform services at the facility (typically not limited to investors) perform the professional component of these services. Examples are ambulatory surgical centers, imaging centers, and diagnostic cardiac catheterization laboratories. They are normally structured as limited liability companies in order to afford the physician investors protection from double taxation while limiting the parties' risk of personal liability. According to IRS guidelines, in order for a tax-exempt organization's participation in a joint venture with non-exempt participants

to be considered an activity related to its exempt purpose, the exempt organization must be able to exercise sufficient control over the venture to ensure that it is operated in an exempt manner. (See also *equity joint venture*, “*under arrangements*” *joint venture*, *participating tax-exempt bond transactions*, and *gainsharing*.)

### **The Leapfrog Group**

An initiative driven by organizations that buy healthcare that are working to initiate breakthrough improvements in the safety, quality, and affordability of healthcare for Americans. It encourages hospitals to adopt four “safety leaps:” computerized physician/provider order entry (CPOE), use of intensivists, evidence-based hospital referral (EHR), and NQF-endorsed safe practices.

### **Length of stay (LOS)**

The period of hospitalization as measured in days billed.

### **Leverage**

See *capital structure*.

### **Liquidity**

Financial ratios that measure the ability of a corporation to meet its short-term liabilities as they come due.

### **Long-term care**

Housing, healthcare, and other support services provided on a long-term basis to individuals who are aged, chronically ill, or disabled. This type of care is often provided in nursing homes.

### **Magnet Recognition Program®**

A designation through the American Nurses Credentialing Center that recognizes healthcare organizations for quality patient care, nursing excellence, and innovations in professional nursing practice. It is considered the highest recognition hospitals and health systems can receive for quality nursing care.

### **Managed care**

An organized system of managing and financing the delivery of healthcare services to control the cost and quality of, and access to, services provided to plan members; includes a full range of integrated healthcare services, facilities, and products in which a patient’s access is coordinated and managed by a primary care provider (gatekeeper); objectives are to contain costs, coordinate, and control patient utilization of services and resources, and to ensure favorable outcomes.

### **Managed competition**

An economic theory/mechanism designed to blend government regulation with competition in the marketplace; employers would join large purchasing cooperatives to buy healthcare services from a network of providers in order to compete for consumers based on price, quality, and a standardized package of benefits.

**Management by walking around (MBWA)**

An approach in which a member of a hospital management team regularly walks through offices, lab areas, patient rooms, and so forth, to talk to employees, patients, and families to find out about any issues or problems and receive feedback.

**Management services organization (MSO)**

An organization that provides administrative and practice-management services to medical groups that are typically owned by physicians; commonly furnishes sites, facilities, equipment, and administrative staff and services, allowing physicians to concentrate on practicing medicine.

**Marginal cost**

The cost of producing an extra unit of product; a key consideration in pricing and in calculating cost implications of business expansion or contraction.

**Market basket (MB)**

A measure of all the goods and services that a hospital must buy to provide care. The market basket measures a fixed set of goods and services for the hospital and compares it with how much those same items would cost at a later or earlier time.

**Means test**

An annual income and assets test to determine if a person or family qualifies for public support.

**Medicaid**

A federal program that is jointly managed by federal and state governments and designed to provide healthcare services for the poor (i.e., those persons who, regardless of age, have insufficient income and assets to pay the costs themselves); it has become a major source of funding for nursing home care for the elderly.

**Medicaid and CHIP Payment Access Commission (MACPAC)**

A commission established by the Children's Health Insurance Program Reauthorization Act of 2009 to review Medicaid and State Children's Health Insurance Program (CHIP) access and payment policies and to advise Congress on a wide range of Medicaid and CHIP issues.

**Medical foundation**

A tax-exempt, physician-sponsored organization that acquires the business and clinical assets of a physician group and manages the business.

**The Medical Home**

A model for primary care coordination (to address primary care physician shortages and the growing prevalence of chronic diseases) through a primary care "gate-keeper." Enabled under the Tax Relief and Health Care Reform Act of 2006, it will be demonstrated in Medicare pilot programs. The model has significant implications for primary care delivery and compensation, chronic care management,

evidence-based medicine, personal health records, and related initiatives. The model changes the current reimbursement structure by providing reimbursement in the form of a “care management fee” to a physician practice or hospital for the services of a “personal physician.” CMS will use the relative value scale update committee (RUC) process to establish the care management fees (though some speculate the goal is to ultimately reduce Medicare reimbursement to hospitals and physicians). CMS has solicited for practices to participate in the demonstration, which began in early 2011. The concept of a medical home is also expected to play a significant role in the formation of accountable care organizations (ACOs), to provide a center of care coordination for improved patient outcomes.

### **Medical loss ratio (MLR)**

The ratio of money paid out by an insurer for claims, divided by premiums collected for a particular type of insurance policy. The Affordable Care Act requires health insurance issuers to submit data on MLRs and to issue rebates to enrollees if this percentage does not meet the minimum standards. MLR requires insurance companies to spend at least 80 or 85 percent of premium dollars on medical care, with the review provisions imposing tighter limits on health insurance rate increases.

### **Medically indigent**

A term used in the healthcare sector to describe those who do not have and cannot afford insurance coverage.

### **Medicare**

A federally administered health insurance program for persons 65 years of age and older and certain disabled persons under the age of 65; Medicare eligibility is not based on disability, income, or asset requirements. Medicare Part A covers hospital, inpatient costs, and prescription drugs patients receive in the hospital, and is financed entirely through taxes; Medicare Part B covers outpatient/ambulatory care and is financed by taxes and individual payments toward the Part B premium. A new prescription drug benefit (Part C) was added to the program. Because Parts B and C require premium contributions from individuals, they are voluntary—i.e., Medicare beneficiaries can choose whether or not to participate.

### **Medicare Access and CHIP Reauthorization Act (MACRA)**

Bipartisan federal legislation passed by Congress and signed by President Obama on April 15, 2015. MACRA replaces the Medicare Part B sustainable growth rate (SGR), the fee-for-service adjustment method used since 1997 to reimburse physicians for Medicare services. MACRA creates two new payment formula options for physicians and other clinicians: the Merit-Based Incentive Payment System (MIPS) and eligible advanced Alternative Payment Models (APMs).

### **Medicare Advantage (MA)**

Private health plans that have contracted with Medicare to provide members with their Medicare Part A and Part B benefits. This plan was established as part of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 and replaced the Medicare+Choice program.

### **Medicare donut hole**

The uncovered portion of a Medicare beneficiaries' Part D prescription drug benefit plan that leaves them financially obligated for the cost of covered prescription drugs once a certain level of expenditures is reached during an enrollment year. The Affordable Care Act shrinks the donut hole by reducing beneficiary copayments each year until the donut hole is essentially eliminated by 2020.

### **Medicare, Medicaid, and S-CHIP Extension Act of 2007 (MMSEA)**

This act makes changes to Medicare, Medicaid, and the State Children's Health Insurance Program, as well as other federally funded programs. Some of the major provisions in the act were to 1) extend CHIP funding through March 2009, 2) extend the qualifying individual program through June 2008, 3) suspend the Medicare physician cut scheduled to take effect, and 4) require group health plans and liability insurers to determine the Medicare-entitlement of all claimants and report certain information to the Secretary of Health and Human Services.

### **Medicare Prescription Drug, Improvement, and Modernization Act (MMA)**

Legislation passed by Congress in 2003 and signed into law by the President in 2004 that initially offers a prescription discount card (at a nominal fee) to Medicare beneficiaries. Beginning in 2006, MMA made available a prescription drug benefit to Medicare enrollees who enroll in the plan and pay a premium. The law also includes other changes designed to modernize the Medicare program.

### **Medicare severity-diagnosis related group (MS-DRG)**

The Medicare severity-diagnosis related group replaces the former DRG program, which was phased in over 2008–2009. According to CMS, 745 MS-DRGs replaced the former 538 DRGs, with three severity levels based on complications or co-morbidities (CCs): 1) with major CCs; 2) with CCs; and 3) with no CCs.

### **Medicare Shared Savings Program**

A program established by CMS that allows healthcare providers to join together in accountable care organizations (ACOs) to integrate and coordinate services in return for a share of any savings to the Medicare program. Medicare Shared Savings Program ACOs will be rewarded for lowering growth in Medicare costs while meeting performance standards on quality of care and putting patients first.

### **Medicare wage index**

An index used to adjust Medicare DRG payments to providers based on variations in labor costs between rural and metropolitan areas and across metropolitan areas.

### **Medigap**

Supplemental health insurance sold by private insurance companies to fill the "gaps" in original Medicare Plan coverage. There are 12 different standardized Medigap policies (plans A through L), and Medigap policies must be clearly identified as "Medicare Supplement Insurance." Each plan has a different set of basic and extra benefits.

**Merger**

Union of two or more organizations by the transfer of all assets to one organization that continues to exist while the other(s) is (are) dissolved.

**Merit-Based Incentive Payment System (MIPS)**

One of two new payment formula options for physicians and other clinicians under MACRA that incentivize quality and value. MIPS will put a portion of an eligible clinician's payments at risk, beginning at 4 percent in 2019, increasing up to 9 percent by 2022. Individual physicians will be measured and given a score based on performance across four population health-oriented domains: quality, resource use, clinical practice improvement activities, and meaningful use of an electronic health record system. (Also see *Medicare Access and CHIP Reauthorization Act* and *Alternative Payment Models*.)

**Mid-level practitioner**

Nurses, physician assistants, midwives, and other nonphysicians who can deliver medical care under the sponsorship of a practicing physician.

**Morbidity**

The frequency and severity of sickness and accidents in a defined class, area, or population.

**Mortality**

Incidence of death in a defined population.

**Multi-hospital system**

Two or more hospitals owned, leased, contract managed, or sponsored by a central organization.

**Multi-specialty group**

A group of physicians representing two or more medical specialties who work together in a group practice setting and generally share profits, equipment, facilities, personnel, and office expenses.

**National Committee for Quality Assurance (NCQA)**

A national organization that conducts quality-focused reviews of HMOs and other managed care plans.

**National Integrated Accreditation for Healthcare Organizations (NIAHO(R))**

A hospital accreditation program of DNV GL (formerly called DNV Healthcare, Inc.). On September 30, 2008, the Centers for Medicare & Medicaid Services (CMS) approved DNV Healthcare, Inc. to become the first new hospital accreditation organization in more than 30 years (joining The Joint Commission and the American Osteopathic Association). DNV can deem hospitals in compliance with the Medicare Conditions of Participation. The program integrates ISO 9001 Quality Management System with the Medicare Conditions of Participation.

**National Practitioner Data Bank (NPDB)**

Established by HCQIA, this data bank serves as a clearinghouse of information for healthcare organizations throughout the nation. It has a number of reporting requirements that must be followed by healthcare entities that perform peer review. Healthcare bodies that do not make required reports to the NPDB forfeit the peer review immunities they would otherwise be entitled to under HCQIA.

**National provider identifier (NPI)**

A 10-digit, numeric identifier issued to healthcare providers by the Centers for Medicare and Medicaid Services and used for administrative and financial transactions adopted under the Health Insurance Portability and Accountability Act (HIPAA).

**National Quality Forum (NQF)**

A private, not-for-profit membership organization created to develop and implement a national strategy for healthcare quality measurement and reporting. NQF's mission is to improve American healthcare through endorsement of consensus-based national standards for measurement and public reporting of healthcare performance, focusing on whether care is safe, timely, beneficial, patient-centered, equitable, and efficient.

**Network**

A group of providers that contract with a health plan or other insurer to provide a defined set of healthcare services to enrollees according to a predetermined (often discounted) fee schedule.

**“Never events”**

Preventable medical errors that result in serious consequences for the patient. Designated by CMS, the list includes certain hospital-acquired conditions “determined to be reasonably preventable. If a condition is not present upon admission, but is subsequently acquired during the hospital stay, Medicare will no longer pay the additional cost of the hospitalization.” As of October 1, 2008, all of the identified conditions have payment implications when acquired during an inpatient stay. For more information, visit [www.cms.hhs.gov](http://www.cms.hhs.gov).

**Next Generation ACO Model**

A model offered by the Center for Medicare & Medicaid Innovation for ACOs that are experienced in coordinating care for populations of patients. It allows these provider groups to assume higher levels of financial risk and reward than are available under the current Pioneer Model and Medicare Shared Savings Program. The purpose is to test whether strong financial incentives for ACOs, coupled with tools to support better patient engagement and care management, can improve health outcomes and lower expenditures for Medicare fee-for-service beneficiaries. (Also see *accountable care organization*.)

**Niche provider**

A provider that focuses on a specific market segment, such as a narrow set of medical services or conditions or a specific population.

**Non-catastrophic process**

A process in patient care in which its failure does not directly lead to death or severe injury within hours of the failure. For example, if healthcare workers fail to wash their hands, the patients they touch don't develop a devastating infection within minutes or hours, and most patients won't develop an infection at all. But non-catastrophic processes may still harm the patient. (See also *catastrophic processes*.)

**Nurse practitioner (NP)**

Nurse practitioners practice at an advanced level to provide care in a range of settings. NPs are responsible and accountable for health promotion, disease prevention, health education, and counseling as well as the diagnosis and management of acute and chronic diseases. They provide initial, ongoing, and comprehensive care to patients in family practice, pediatrics, internal medicine, geriatrics, and women's health.

**Oncology Care Model (OCM)**

A payment and delivery model developed by the Center for Medicare & Medicaid Innovation that aims to provide higher quality, more highly coordinated oncology care at the same or lower cost to Medicare. Under the OCM, physician practices have entered into payment arrangements that include financial and performance accountability for episodes of care surrounding chemotherapy administration to cancer patients. The practices participating in OCM have committed to providing enhanced services to Medicare beneficiaries, such as care coordination and navigation, and to using national treatment guidelines for care.

**ORYX®**

Introduced in February 1997, The Joint Commission's ORYX® initiative integrates outcomes and other performance measurement data into the accreditation process. ORYX measurement requirements are intended to support Joint Commission accredited organizations in their quality improvement efforts, which now include the standardized common measures referred to as "Hospital Quality Measures" from CMS. The same data set can be used to satisfy both CMS and Joint Commission requirements.

**Outcomes**

The measures of treatments and effectiveness in patient care in terms of cost, mortality, morbidity, health status, quality of life, functional status, and/or patient satisfaction.

**Outlier patients**

Patients who require hospital stays that are unusually long for their diagnosis. Typically a threshold length of stay (LOS) is established that defines when a patient in a certain diagnostic category becomes classified as an outlier.

**Outlier payments**

Additional reimbursement that Medicare and some insurers and health plans provide to hospitals to cover the additional costs of caring for outlier patients.

**Outpatient prospective payment system (OPPS)**

A system developed by the Centers for Medicare and Medicaid Services (CMS) to pay for most outpatient services at hospitals or community mental health centers under Medicare Part B.

**Palliative care**

Comprehensive, interdisciplinary care focusing primarily on promoting quality of life for people living with a serious, chronic, or terminal illness and for their families, assuring physical comfort and psychosocial support. It is appropriate at any age and at any stage in a serious illness and is provided alongside all other appropriate medical treatments.

**Participating tax-exempt bond transaction (PBT)**

An alternative to equity interests in structuring collaborative economic relationships with physicians. PBTs involve the sale of participating instruments to physician investors. Participating bonds pay investors based on the economic performance of the entity on whose behalf the bonds have been issued. These bonds are often subordinated obligations. As a result, the interest rate on these bonds is much higher than that available on traditional fixed-interest bonds. Because of the potential to yield high rates of tax-exempt interest, participating bonds have proven attractive alternatives to equity interests in structuring collaborative economic relationships with physicians.

**Partnership for Patients**

The Partnership for Patients is a public-private partnership working to improve the quality, safety, and affordability of healthcare for all Americans. The Partnership for Patients aims to engage 100 percent of the nation's acute care medical centers participating in making hospital care safer, more reliable, and less costly through the achievement of two goals: 1) making care safer by keeping patients from getting injured or sicker in the healthcare system, and 2) helping patients heal without complication by improving transitions from acute-care hospitals to other care settings.

**Patient-centered care**

See *customer-centered care*.

**Patient-Centered Outcomes Research Institute (PCORI)**

Established by legislation under the Affordable Care Act, the PCORI is an independent, non-profit organization overseen by a board of governors made up of directors from AHRQ and NIH along with 17 other appointed members, including three from the patient/consumer community. The PCORI is charged with identifying research priorities based on certain factors and authorized to commission a wide variety of different types of comparative effectiveness research studies with respect

to the relative health outcomes, clinical effectiveness, and appropriateness of medical treatments and services.

### **Patient Protection and Affordable Care Act of 2010 (PPACA)**

A federal statute that was signed into law by President Barack Obama on March 23, 2010. Along with the Health Care and Education Reconciliation Act of 2010 (HCERA, signed into law on March 30, 2010), provisions of the legislation include: increasing health insurance coverage, expanding Medicaid eligibility, improving quality and efficiency of medical care services, subsidizing insurance premiums, prohibiting denial of coverage/claims based on pre-existing conditions, providing incentives for businesses to provide healthcare benefits, and supporting healthcare workers through a new workforce training and education infrastructure.

### **Patient Safety and Quality Improvement Act (PSQIA)**

As of July 29, 2005, the act was designed to create a national patient safety center to address medical errors within the healthcare system. It establishes patient safety organizations (PSOs) to which providers (individuals and entities) can voluntarily report medical errors and patient safety information. The PSOs will then take the information, analyze it, and provide feedback. (See *patient safety work product*.)

### **Patient safety work product (PSWP)**

Data, reports, records, memoranda, analyses (including root-cause analyses), and written or oral statements that are collected or developed for reporting to a patient safety organization (PSO) and that are, in fact, reported to a PSO.

PSWPs do not include patient medical records, billing or discharge information, or any other original patient or provider record. Information that is collected, maintained, or developed separately, or exists separately from a patient safety evaluation system is not protected under PSQIA. (See *Patient Safety and Quality Improvement Act*.)

### **Patient's Bill of Rights**

A policy issued on July 22, 2010, by the Departments of Health and Human Services, Labor and Treasury that helps children (and eventually all Americans) with pre-existing conditions gain coverage and keep it, protect all Americans' choice of doctors, and end lifetime limits on the care consumers may receive. These new protections create an important foundation of patients' rights in the private health insurance market that puts Americans in charge of their own health.

### **Pay-for-performance**

An emerging movement in health insurance reimbursement (initially in Britain and United States). This payment system links compensation to quality goals, and providers under this arrangement are rewarded for an improvement in the quality of healthcare services. Using a set of clinical performance standards, hospitals collect data to measure adherence to the standards. The hospital and the payer establish an agreed-upon performance baseline. The payer agrees to financially reward

over-achievers with higher reimbursements, and also penalize under-performers with lower reimbursements. CMS has engaged in pilot programs to demonstrate how this type of payment system would function.

**Payer (payor)**

Any agency, insurer, or health plan (including the federal government) that pays for healthcare services and is responsible for reimbursing providers for the provision of those services.

**Payment-to-cost ratio**

The level of hospital payment divided by costs. A ratio of 1 indicates, for example, that payments are equal to 100 percent of costs.

**Per case reimbursement**

A payment method in which a health plan or insurer reimburses a hospital a flat amount for the patient's entire stay, with the amount typically varying by diagnosis or DRG.

**Per diem reimbursement**

A payment method in which a health plan or insurer reimburses a hospital a flat amount for each day the patient is in the hospital.

**Per member per month (PMPM)**

The amount of money a health plan or provider receives per person every month under capitated payment arrangements; may relate to either revenues or costs.

**Pharmacogenetics**

The study of the effect of genetic inheritance on individual response to drugs.

**Physician Assistant (PA)**

A specially trained and licensed health professional who performs certain medical procedures under the supervision of a physician. Often these tasks would be performed by the physician if a PA were not available.

**Physician extender**

Health professional, such as a nurse or health educator, who works with patients in order to make the patient's time with the physician more efficient and productive.

**Physician Group Practice Demonstration**

Medicare's pay-for-performance demonstration project for physician groups.

**Physician-hospital organization (PHO)**

A contractual organization of a hospital and its medical staff developed for the purpose of contracting directly with employers and managed care organizations, and the opportunity to better market physician-hospital services and achieve

administrative efficiencies. PHOs can be “closed” (i.e., the hospital works only with select physicians who are typically chosen based on cost-effectiveness and/or high quality) or “open” (i.e., the hospital works with all members of the medical staff who wish to participate).

### **Physician Quality Reporting System (PQRS)**

A voluntary reporting program created by the 2006 Tax Relief and Health Care Act that physicians use to report data on quality performance measures for services provided to Medicare beneficiaries. Those who satisfactorily report this data are offered payment incentives.

### **Pioneer ACO**

The Pioneer ACO was developed by the CMS Innovation Center and intended for provider organizations that have robust processes of care and the organizational infrastructure and experience necessary to eventually assume responsibility for enrolled Medicare beneficiaries in a population-based payment model. Participating ACOs must meet quality reporting requirements and other organizational requirements of the Medicare Shared Savings Program. Compared to the Shaved Savings Program, the Pioneer ACO program has higher shared savings and loss rates. It also includes movement to a population-based payment model that comprises 50 percent of the total fee-for-service payment rate. (Also see *accountable care organization*.)

### **Point of service (POS)**

An option given to members of HMOs and PPOs to see physicians or use facilities outside the specific network of physicians or hospitals outlined in their plans. Members can choose to go outside the network at the time they need service, but they typically absorb higher out-of-pocket expenses (e.g., through higher coinsurance) if they do so.

### **Policy**

A statement of intent that guides and constrains further decision making and action, and limits subsequent choices.

### **Population health**

The distribution of health outcomes within a population, the health determinants that influence distribution, and the policies and interventions that impact the determinants. Population health spans wellness and health promotion, management of chronic disease, care of the frail and elderly, and palliative care for those at the end of life. Population health approaches address the broader landscape of healthcare consumers to preserve wellness and minimize the impact of illness.

### **Pre-Existing Condition Insurance Plan (PCIP)**

A program that makes health coverage available to individuals who are U.S. citizens or reside in the U.S. legally, have been denied health insurance because of a pre-existing condition, and have been uninsured for at least six months. This program

provided coverage until 2014. Now, these individuals have access to affordable health insurance choices through an exchange, and can no longer be discriminated against based on a pre-existing condition.

**Preferred provider organization (PPO)**

A health plan that contracts with independent providers at a discount for services; physicians receive reduced rates in return for larger patient volumes. PPO members can typically choose to go to non-network providers, but they will face higher out-of-pocket expenses if they do.

**Prevalence**

The number of cases of a disease or condition existing in a given population during a specific period of time or at a particular moment in time.

**Preventive care**

Healthcare that emphasizes the early detection and treatment of diseases. Preventive care is intended to keep people healthier for longer, thus reducing healthcare costs over the long term.

**Primary care**

Basic medical care, including preventive services, provided on a regular basis to individuals, typically in a doctor's office.

**Primary prevention**

Care provided to prevent the initial onset of a disease or condition, such as physicians encouraging patients to exercise and eat right or counseling smokers to quit.

**Private inurement**

See *inurement*.

**Process-of-care measures**

The measures of timely and effective care that show the percentage of patients who receive treatments known to get the best results for certain common, serious medical conditions or surgical procedures, and how quickly hospitals treat patients who come to the hospital with certain medical emergencies. The measures only apply to patients for whom the recommended treatment would be appropriate.

**Public reporting (in healthcare)**

Due to increased government scrutiny of not-for-profit healthcare organizations, many states are now requiring mandatory reporting of hospital data, both quality and financial. There are also a number of voluntary reporting initiatives nationwide. The reported data include defined performance measures for clinical processes, clinical outcomes, cost, and administrative actions, as well as publication of provider performance results.

**Purchaser**

Those entities, including public and private employers, the federal government, and state governments, that pay insurers and health plans directly for health coverage on behalf of employees and/or eligible beneficiaries.

**Qualified Health Plan**

An insurance plan that is certified by a state or federal exchange, provides essential health benefits, follows established limits on cost-sharing (like deductibles, copayments, and out-of-pocket maximum amounts), and meets other requirements outlined in the Affordable Care Act.

**Quality**

The degree to which health services for individuals and populations include the following six dimensions, from the Institute of Medicine (IOM): 1) safety, or freedom from accidental harm, 2) effectiveness, or evidence-based care, 3) patient-centeredness, 4) timeliness, or care that ensures prompt access to appointments, diagnosis, and treatment, 5) efficiency, or care delivered with optimal use of resources, and 6) equitable care, that doesn't vary due to personal characteristics such as gender, ethnicity, geographic location, or socioeconomic status.

**Quality assurance (QA)**

A process that objectively and systematically measures, evaluates, and monitors the level of patient care being provided by physicians, hospitals, or other healthcare providers and organizations to ensure that patients are receiving the best and most appropriate care possible.

**Quality Improvement Organization (QIO)**

A group of health quality experts, clinicians, and consumers organized to improve the care delivered to people with Medicare. QIOs work under the direction of the Centers for Medicare & Medicaid Services to assist Medicare providers with quality improvement and to review quality concerns for the protection of beneficiaries and the Medicare Trust Fund.

**Quality Payment Program (QPP)**

An approach to payment created under the MACRA legislation that replaces the sustainable growth rate (SGR) and rewards the delivery of high-quality patient care through two tracks: the Merit-Based Incentive Payment System (MIPS) and eligible advanced Alternative Payment Models (APMs). Clinicians participating in an advanced APM may earn an incentive payment for participating in an innovative payment model, and clinicians participating in MIPS will earn a performance-based payment adjustment.

**Quaternary care**

The most highly specialized hospital services, available only in select facilities staffed by highly trained specialists. Examples include organ transplants, including heart, lung, and kidney transplants.

**Qui tam action**

An abbreviation of the Latin phrase *qui tam pro domino rege quam pro si ipso in hac parte sequitur*, which means, “He who brings the action for the King as well as for himself.” *Qui tam* provisions of a statute allow a private person to bring a civil action on behalf of both the United States and himself, and to share in part of the monetary recovery. The individual bringing the *qui tam* action can receive between 15 percent and 25 percent of whatever is recovered from the lawsuit, with the remainder going to the government. (See *False Claims Act*.)

**Racketeer Influenced and Corrupt Organization (RICO) Act**

Originally passed in 1970 to combat the mafia, the RICO Act allows a criminal claim to be brought by any person injured due to corruption or racketeering. One of the law’s provisions provides for generous compensation for those injured by wire or mail fraud, which has led to frequent use of the act by lawyers, especially during the 1980s. Subsequent rulings have somewhat limited its use.

**Rapid response team (RRT)**

A team of clinicians who bring critical care expertise to the bedside, and can be called by any hospital staff at the first sign of patient decline. Also known as a medical emergency team, or MET.

**Recovery audit contractor (RAC)**

A private firm hired and paid by CMS to audit the claims of providers that participate in fee-for-service Medicare, including hospitals, skilled nursing facilities, physicians, durable medical equipment (DME) suppliers, and labs. The RACs are tasked with identifying provider billing in violation of Medicare policy (both underpayments and overpayments) and recoup overpayments and refund underpayments under Part A or B of the Medicare program. For demonstration purposes, RACs have audited providers’ billing information in California, Florida, New York, Massachusetts, South Carolina, and Arizona. As of March 27, 2008 (the end of the demonstration phase), RACs succeeded in collecting more than \$1.03 billion in “improper” Medicare payments (85 percent of which came from inpatient hospital providers). However, RACs collect overpayments from providers before proving that the billing was indeed “improper,” and providers have to appeal to have the funds returned, even if they have billed correctly. RACs also have the ability to deny claims in process if they have not yet been paid. The RAC permanent program began implementation in 2008 and became nationwide in 2010.

**Recovery care center**

A facility that provides routine outpatient surgery and low-risk surgical procedures that require only a brief inpatient stay, usually two days or less.

**Regional health information organization (RHIO)**

An organization that facilitates the exchange of electronic health records (sometimes referred to as a health information network or HIN).

**Reliability**

Reliability in healthcare is “failure-free operation over time from the viewpoint of the patient.” (As defined by Roger Resar, M.D. and his colleagues at IHI.)

**Reporting Hospital Quality Data for Annual Payment Update (RHQDAPU)**

See *Hospital Inpatient Quality Reporting Program*.

**Resource allocation**

In strategic planning, a resource-allocation decision is a plan for using available resources to achieve goals for the future. It is the process of allocating resources among the various projects or business units.

**Resource-based relative value scale (RBRVS)**

A fee schedule developed by the CMS to provide a more equitable physician reimbursement system for use by Medicare recipients; based on providers’ training and skills rather than fees charged.

**Return on assets (ROA)**

See *return on investment*.

**Return on equity (ROE)**

After-tax earnings of a corporation divided by its stockholders’ equity; stockholders’ equity is determined by deducting total liabilities and intangible assets from total assets; often considered to be the most important of profitability ratios; objective is to realize ROE of at least 15 percent in order to provide for dividends and fund future growth.

**Return on investment (also called return on assets)**

After-tax income for a specified period of time divided by total assets; a financial tool to measure and relate a corporation’s earnings to its total asset base.

**Risk management**

A program of activities to identify, evaluate, and take corrective action against risks that may lead to patient or employee injury and/or property loss or damage with resulting financial loss or legal liability.

**Root-cause analysis**

A problem solving method aimed at identifying the root causes of problems or events. The practice is predicated on the belief that problems are best solved by attempting to correct or eliminate root causes, as opposed to merely addressing the immediately obvious symptoms. By directing corrective measures at root causes, it is hoped that the likelihood of problem recurrence will be minimized. However, it is recognized that complete prevention of recurrence by a single intervention is not always possible. Thus, it is often considered to be an iterative process, and is frequently viewed as a tool of continuous improvement.

**Safe harbor**

Regulatory or statutory provisions that shield certain designated payment arrangements from criminal prosecution or insurance program exclusion. Safe harbor provisions are contained in the Stark laws and the anti-kickback statute. An example of a safe harbor commonly used by hospitals and physicians is one existing under the anti-kickback statute for personal services contracts. The required elements of that safe harbor include that:

- The agreement is contained in writing and signed by the parties.
- The agreement covers and specifies all of the services provided.
- The agreement provides the schedule of services.
- The term of the agreement is at least one year.
- Aggregate compensation is set in advance, consistent with fair market value in arm's length transactions, and not determined in a manner that takes into account the volume or value of any referrals or business otherwise generated between the parties.
- The services provided do not involve the counseling or promotion of illegal activities.
- Aggregate services contracted for do not exceed those that are reasonably necessary to accomplish the commercially reasonable business purpose of the services.

(See *anti-kickback statute* and *Stark law & regulations*.)

**Sarbanes-Oxley Act (SOA or SOX)**

Comprehensive legislation passed by Congress in 2002 that affects corporate governance, financial disclosure, and the practice of public accounting for publicly-held corporations. While its provisions do not specifically affect non-profit organizations, many healthcare organizations have applied it to their practices, and since 2002 there has been much action at the government level to look at the business practices of non-profit organizations with the same scrutiny, especially healthcare organizations.

**Sentinel event**

An event, as defined by The Joint Commission, as any unanticipated event in a healthcare setting resulting in death or serious physical or psychological injury to a person or persons, not related to the natural course of the patient's illness. Sentinel events are identified under Joint Commission accreditation policies to help aid in root cause analysis and to assist in development of preventative measures. The Joint Commission tracks events in a database to ensure events are adequately analyzed and undesirable trends or decreases in performance are caught early and mitigated.

**Shared Savings Program (SSP)**

See *Medicare Shared Savings Program*.

### **Single-payer system**

A healthcare system in which a single entity functions as the central purchaser of healthcare services. This entity collects healthcare fees and pays for all healthcare costs, but is not involved in the delivery of care.

### **Six Sigma**

A statistical term that refers to a process that produces less than 3.4 defects out of every one million opportunities. The term is also commonly used to describe a business strategy that aims to eliminate waste and to drive the quality and cost performance of any process to this level. Many healthcare processes currently operate far below this level of performance, suggesting the opportunity for significant cost reduction and quality enhancement through application of this strategy in healthcare.

### **Skilled nursing facility (SNF)**

An institution that provides skilled nursing care and related services to patients who no longer require hospital care but do require 24-hour medical care or rehabilitation services.

### **Small Business Health Options Program (SHOP)**

Programs designed to help small employers access affordable insurance for their employees. SHOP exchanges offer a variety of health plans; provide comparative information on benefits, costs, and quality; and facilitate enrollment in a plan of choice. The Affordable Care Act requires states to create SHOP exchanges and allows states to combine their SHOP exchange with their exchange for individual consumers.

### **Sole community hospital (SCH)**

Hospitals that, according to Medicare regulations, represent the only source of inpatient and/or emergency care within a defined geographic area. SCHs are eligible for adjustments in payment rates. Often these hospitals are also designated critical access hospitals (CAHs), and thus subject to additional requirements under Medicare.

### **Specialty hospital**

A hospital that specializes in a particular product niche, such as cardiac care or orthopedic care. These hospitals can be either for-profit or not-for-profit facilities.

### **Spend-down**

A method by which an individual reduces his or her gross income and assets until that individual meets the financial requirements to be eligible for Medicaid.

### **Staff model HMO**

A type of HMO that employs its own physicians to provide healthcare to its enrollees; physician employees usually provide all ambulatory care services under one

roof and are compensated by salary and bonus based on the HMO's profits. Kaiser is the most well-known staff model HMO.

### **Stand in the shoes**

A provision under the Stark II Phase III, which states that a physician “stands in the shoes” of his or her group practice for the purpose of determining whether Stark covers the doctor’s relationship with another entity. This requirement was postponed starting December 2007 for academic medical centers. Effective October 2008, the stand in the shoes rule was modified to permit—but not require—a physician to stand in the shoes of his or her physician organization if that physician had no ownership or investment interest in the physician organization. (See *Stark law & regulations*.)

### **Stark law & regulations**

**Stark I:** Colloquial name for the physician self-referral prohibitions introduced to Congress in 1988 by California representative Fortney Pete Stark. The law provides that a physician or an immediate family member who has a financial relationship with an entity may not refer a Medicare patient to that entity for clinical laboratory services, unless an applicable exception exists. In addition, the law prevents an entity with which a physician has a financial relationship from billing Medicare or a beneficiary for clinical laboratory services furnished pursuant to a prohibited referral.

**Stark II:** The 1993 amendments to Stark I extended the physician self-referral restrictions to Medicaid services and beneficiaries and expanded the referral and billing prohibitions to 10 additional designated health services reimbursable by Medicare or Medicaid. The 10 services are 1) physical therapy, 2) occupational therapy, 3) radiology services, including magnetic resonance imaging, computerized axial tomography scans, and ultrasound services, 4) radiation therapy services and supplies, 5) DME and supplies, 6) parenteral and enteral nutrients, equipment, and supplies, 7) prosthetics, orthotics, and prosthetic devices, 8) home health services and supplies, 9) outpatient prescription drugs, and 10) inpatient and outpatient hospital services. Stark II became effective on January 1, 1995. The statute contains many exceptions, which can be grouped into categories applicable to all financial relationships, to ownership and investment interests, and to compensation arrangements.

**Stark II Phase III:** Additional regulations interpreting the Stark statutes, which were promulgated and went in to effect in December of 2007. Their most controversial provision says that a physician “stands in the shoes” of his or her group practice for the purpose of determining whether Stark covers the doctor’s relationship with another entity. This requirement was said to be postponed until December 2008 for academic medical centers and was then amended starting October 2008 so that physicians are permitted, but not required to stand in the shoes of their physician organization if they have no ownership or investment interest in them. One positive feature of the Stark II Phase III regulations was making the rules regarding physician recruitment more flexible.

### **State Children's Health Insurance Program (SCHIP)**

State-run programs that provide insurance coverage to children in low-income families who are not eligible for Medicaid. The federal government provides significant financial support to the states for SCHIP.

### **Swap**

In finance, a swap is a derivative in which two counterparties agree to exchange one stream of cash flows against another stream. These streams are called the legs of the swap. The cash flows are calculated over a notional principal amount, which is usually not exchanged between counterparties. Consequently, swaps can be used to create unfunded exposures to an underlying asset, since counterparties can earn the profit or loss from movements in price without having to post the notional amount in cash or collateral. Swaps can be used to hedge certain risks such as interest-rate risk, or to speculate on changes in the underlying prices.

### **Telehealth**

The use of electronic information and communication technologies to manage health and well-being. Telehealth supports long-distance clinical healthcare, patient and professional health-related education, public health, and health administration. Technologies include everything from videoconferencing to streaming media. Telehealth provides a variety of healthcare services including online support groups, remote monitoring of vital signs, and video or online doctor visits.

### **Tertiary care**

Highly specialized medical care or procedures, such as CABG surgery, that are performed by specialized physicians in a hospital setting.

### **Third-party administrator (TPA)**

A firm or agency, outside the insuring organization, which handles the administration of a group insurance plan, including the processing of claims and billing.

### **Third-party payer**

An organization, usually an insurance company, that acts as an intermediary between the provider and the consumer of care, that pays for the services provided but does not provide the services (e.g., HMOs, insurance carriers, the government).

### **Toyota Lean**

A management philosophy based on Toyota's production model that focuses on reduction of the seven wastes (over-production, waiting time, transportation, processing, inventory, motion, and scrap). By eliminating waste, quality is improved, production time is reduced, and cost is reduced. Tools include constant process analysis, "pull" production, and mistake-proofing. Toyota Lean is also focused on creating a better workplace. One of the recent trends in healthcare has been the application of lean principles to improving patient care and reducing medical errors. (See *Six Sigma*.)

**Transparency**

A metaphorical extension of the meaning of “transparent:” a transparent object is one that can be seen through. It implies openness, communication, and accountability. It is introduced as a means of holding directors and public officers accountable and fighting corruption. Transparency is the opposite of privacy; an activity is transparent if all information about it is open and freely available.

**Triage**

A method by which patients are directed to services and prioritized for care based on the severity or urgency of their injury or illness.

**Triple Aim**

A community health initiative the Institute for Healthcare Improvement (IHI) launched in October 2007 that is designed to help a diverse group of healthcare organizations, health plans, public health departments, social service organizations, community-based coalitions, and others: 1) improve the overall health of a population, 2) improve the patients’ experience of care (including quality, access, and reliability), and 3) reduce the per capita cost of care. The IHI believes these three aims are intricately related and emphasizes the need to pursue all three objectives at once.

**Unbundling**

The unethical practice of a provider, in order to increase total revenues for a service or procedure, to bill for multiple, separate components of a medical service or procedure that are normally covered under one procedure code.

**“Under arrangements” joint venture**

This type of joint venture takes its name from a Medicare rule that allows hospitals to purchase some of the services they bill to Medicare from third parties “under arrangements.” As adapted to hospital–physician joint ventures, the physicians form an LLC (or other partnership entity), either alone or, more commonly, with the hospital. The LLC contracts with the hospital for the LLC to provide a bundle of services within a hospital service line. In return, the LLC would receive fair market value compensation, calculated either as an annual amount set in advance, or on a fee-schedule basis for each Ambulatory Payment Classification or APC (the outpatient equivalent of the DRG). Thus, compensation differs from an equity joint venture in which distributions are based on variable cash flow.

In CMS’s Physician Self-Referral and Hospital Ownership Disclosure Provisions in the IPPS FY 2009 final rule, CMS has revised the definition of “entity” concerning “under arrangements” joint ventures. Under existing rules, an entity is considered to be furnishing designated health services (DHS), and thus subject to the physician self-referral rules, only if it is billing Medicare for the DHS. Currently, hospitals are able to refer patients to a physician service provider in which they have an ownership/investment interest, without having to meet an ownership exception, if the physician service provider performs the service but sells it to a hospital or other provider that bills it as DHS to Medicare. The final rule revises the definition of a DHS

“entity” to include both the entity that bills Medicare for the service as well as the entity that performs the service.

### **Underwriting cycle**

Repeating patterns of gains and losses within the insurance industry.

### **Unit-cost reduction**

In the context of healthcare, reducing per-unit costs requires monitoring costs of individual services over time and determining how to lower costs by reducing waste and improving efficiency, while still maintaining high-quality care.

### **URAC (formerly Utilization Review Accreditation Commission)**

An independent, not-for-profit organization that accredits and certifies PPOs and promotes quality through various benchmarking and quality improvement programs.

### **U.S. Preventative Services Task Force (USPSTF)**

An independent panel of primary care and prevention experts that conducts scientific evidence reviews in order to make recommendations for clinical preventative services. The task force is funded and regulated by the U.S. Department of Health and Human Services’ Agency for Healthcare Research and Quality (AHRQ).

### **Utilization**

Patterns of use for particular healthcare services such as hospital care, physician visits, or prescription drugs.

### **Value-Based Insurance Design (VBID)**

A mechanism gaining traction in the commercial insurance market to better align patient copayments and premiums with the value of healthcare services. VBID plans reduce out-of-pocket expenses for consumers for high-value treatments, drugs, and services that are proven to prevent or manage disease.

### **Value-Based Purchasing Program**

Established by the Affordable Care Act, this program began linking provider payments to improved performance by healthcare providers starting on October 1, 2012. This form of payment holds hospitals and health systems accountable for both the cost and quality of care they provide. It is designed to promote better clinical outcomes for patients as well as improve their experience of care during hospital stays, and to identify and reward the best-performing providers.

### **Variable cost**

A cost that varies with output or organizational activity (e.g., labor, materials).

**Vertical integration**

An integrated delivery system (IDS) that provides a full range of healthcare services, from outpatient to hospital long-term care, for the purpose of serving total healthcare needs of a geographic population; may include financing mechanisms and alliances with managed care plans to distribute/manage risk and capture market share.

**Women, Infants, and Children (WIC) Program**

A federal program that provides food, nutrition education, and access to healthcare to low income pregnant women and new mothers, as well as to infants and children living below 185 percent of the poverty line who are at nutritional risk.

**Working capital**

A corporation's investment in current assets; net working capital is the excess of current assets over current liabilities.
