[Advancing Your Digital Health Strategy](#)

Healthcare boards must be involved in the digital transformation of their organizations. The quality, safety, and efficiency of care is increasingly being determined by how well an organization's technology works. This toolbook combines thought leadership and front-line experience from five provider organizations that are leaders in the digital health arena to provide an actionable framework for boards and senior leaders to assess their digital health strategy and capabilities in order to further the journey towards seamless integration of digital health solutions with care delivery.

[Is There an Avatar in the House? Changing the DNA of Healthcare in the Age of Artificial Intelligence](#)

Healthcare is in desperate need of a makeover, with a focus on becoming more consumer-centric. This summary of a presentation from The Governance Institute's March 2019 System Forum, explains what Jefferson Health did to transition from a business-to-business model in which providers sell themselves to physicians and insurers, to a business-to-consumer model in which providers sell themselves to consumers.

[Health System Planning in a Disrupted Future](#)

There is no single "right" path forward to the future, but there are a number of key considerations that every healthcare organization should be thinking through to define how they will exist in a fundamentally different future. This article provides guidelines for hospitals and health systems as they tackle the development of their digital strategy.

[Is There an Avatar in the House? Changing the DNA of Healthcare in the Age of A.I.](#)

Watch Stephen K. Klasko, M.D., M.B.A., President and CEO of Thomas Jefferson University and Jefferson Health tell the story of how based on a vision of re-imagining health, education, and discovery, Jefferson cleared the decks, merged their university with their health system, articulated a new credo of "healthcare where you are," and went from three hospitals to 18 with the country's largest own faculty-based virtual health offering.

[The Health System in a Digital World: Imperatives and Opportunities](#)

This Webinar brought together a panel of experts to discuss how digital health will change the structure of healthcare delivery, along with the need to seamlessly integrate digital health with necessary in-person care that will remain but will also evolve to better meet consumer needs and expectations. The program included discussion questions for the board and key action steps to take in order to move towards an integrated, digital delivery system for the 21st century.
