Re: Log4j vulnerability

NRC Health's security team has been monitoring the Zero-Day Exploit Log4j since notification of the issue on December 10, 2021, by our threat intelligence sources. We have been in contact with our partner Nasdaq Boardvantage which provides our Board Portal for our customers. They have completed a full impact assessment and concluded that the Nasdaq Boardvantage service has not been impacted by the Log4j vulnerability. Out of an abundance of caution, they have released a patch for Nasdaq Boardvantage, which will be applied to the environment. The patch includes an upgrade to the 2.16.0 version of Log4j.

In support of our high priority to protecting data, the NRC Health Security Team will continue to work with our partners to immediately address any threats that could impact our customer's data. If you have any questions, please let me know.

Regards,

Cris V. Ewell, PhD, CISSP, CISM, CEH
