Glen Tullman

Executive Chairman & CEO
Transcarent

Glen Tullman is the Executive Chairman and Chief Executive Officer of Transcarent, the first comprehensive, consumer-directed health and care platform for employees of self-insured employers and their families. Born in Silicon Valley, Transcarent's platform empowers consumers with the kind of information, guidance, and access that leads to better care, better outcomes, and more cost-effective decisions for everyone. Tullman is the former Executive Chairman, Chief Executive Officer, and Founder of Livongo Health, the first at-scale consumer digital health company to truly empower people with chronic conditions to live better and healthier lives using data science.

A visionary leader and entrepreneur, Tullman previously ran two other public companies that changed the way healthcare is delivered. During his time as Chief Executive Officer of Allscripts, the Company was the leading provider of electronic prescribing, practice management, and electronic health records. Prior to Allscripts, he was Chief Executive Officer of Enterprise Systems, the leading resource management systems for hospitals. Before entering healthcare, Tullman served as President and COO of CCC Information Systems, a provider of computerized systems for the property and casualty insurance sector. Tullman is also one of two Founding Partners at 7wireVentures, one of the highest returning venture capital funds in Illinois. He is the author of *On Our Terms: Empowering the New Health Consumer*, in which he proposes new solutions to address the chronic-condition epidemic facing our country.

Glen is dedicated to finding a cure for diabetes and other chronic conditions—and to keeping people healthy until cures are found. A strong proponent of philanthropy, he was honored in 2019 with a Robert F. Kennedy Human Rights Ripple of Hope Award for his career focused on improving the safety, empathy, and efficiency of our healthcare system. He also serves as a Chancellor to the International Board of the Juvenile Diabetes Research Foundation and as a board member and the incoming Chairperson of the American Diabetes Association.
