

# Nasdaq Governance Solutions

Nasdaq Boardvantage®

Nasdaq continues to invest in our industry-leading governance solutions and we're thrilled to announce enhancements to Nasdaq Boardvantage.

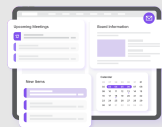

## Refreshed Navigation Menu

We have updated the layout of the navigation menu by grouping together similar modules. It is the first step in a series of updates in the coming months to streamline and modernize the navigation menu's look and feel. We have also moved the Admin module to its own menu item called 'Admin Configuration,' located at the bottom of the navigation menu.

## Simplified Company and TeamSpace Selectors

We have rearranged the company and TeamSpace selectors in one place. You can now access company and TeamSpace selectors in a single dropdown at the top of the page for streamlined organization.

## Enhanced Dashboard Custom Cards

We have added an editor to custom cards, allowing you to easily format text, embed video, resize images and define column layouts as desired. We have also increased the number of custom cards you can add to 10 cards.

## New Filters and Report Capabilities for Approvals

Easily manage approvals using new filters. You can now filter by date created or due date to find the approvals you need. Plus, approval reports can now be customized and saved as archived PDF files.

## Annotations Always in the Right Place

You can now configure notes, pins and bookmarks to move with relevant pages or sections when annotated documents are modified, ensuring they are always in the right place.

## Nasdaq Boardvantage Go Now Available on iPhone

The mobile application for directors to work smarter on the go is now available on iPhone, in addition to iPad. You can now download Nasdaq Boardvantage Go on your iPhone from the App Store.

## Register now for our Nasdaq Boardvantage webinar

Join this session for a comprehensive review of Nasdaq Boardvantage enhancements in 2023. During this session, we will also reveal exciting product updates planned in 2024!

## More Information:

- Coming soon! Enhancements on the Navigation Menu and Selectors are scheduled on December 7 in APAC/Canada and December 8 in the US/EMEA.
- Enhancements on Dashboard Custom Cards, Approvals, and Annotations are currently existing in-platform.
- We do not anticipate any extended downtime, but please note intermittent interruptions may be experienced.
- Please be advised that Nasdaq Boardvantage Go users will be required to install the latest version of the application following the release and will receive a notification prompting the update. There will be no change to the login process.
- This communication is sent to all Company Administrators. Please forward to additional stakeholders as appropriate.

If you have any questions, please contact your Account Representative or Client Support at (866) 330-1743.
